WORLD HAPPENINGS BRIEFLY TOLD

The Alberta Liberal convention, scheduled for June 16 to 18, has been postponed until October.

In a new effort to fill in the gaps between governmental income and outgo, the U.S. Senate voted another increase in income taxes.

The United States senate has voted to put a 100 per cent. tax on incomes earned through violations of state or federal laws.

Calgary, Alberta, was selected as the 1933 convention city of the United Commercial Travellers, jurisdiction of Washington, Oregon, and British Columbia.

Figures tabled in the House of Commons, London, England, show migration between Great Britain and the Dominions was reversed for 1931, Australia sending most back.

Creation of a national library and museum was urged by Sir Robert Falconer, retired president of the University of Toronto, speaking at Ottawa before the Royal Society of Canada.

Viscount Hailsham, secretary of state for war in the British National Government, will represent the British bar at the annual meeting of the Canadian Bar Association at Calgary, in August.

Argentina, although eager to protect its meat, grain and wool markets in Great Britain, is unlikely to send an observer to the Imperial Economic Conference at Ottawa in July.

A warning that only immediate aid to Austria would avert a transfer moratorium on its foreign obligations was delivered to a financial commission of the League of Nations meeting in Paris, France.

Total Chinese casualties of 4,274 troops killed in the Shanghai warfare with Japanese were announced by the Nanking military headquarters. The announcement said 214 officers, and 4,060 men were killed, 677 officers and 1,153 men were wounded.

Dr. R. C. Wallace, president of the University of Alberta, was elected president of the National Conference of Canadian Universities. The term will be for two years. Dr. Wallace is also president of the Association of Canadian Clubs.

A Worthy Alice

Lewis Carroll's Heroine Is Well Received In United States

"Little did Lewis Carroll dream that I would come to the United States to celebrate the hundredth anniversary of his birth. If Lewis Carroll had told me the story which I live today it would have seemed stranger than those he did tell me."

That seems to us a simple, gracious, altogether charming way to put it.

Famous literary heroines do not always come up to expectations. But Mrs. Reginald Liddell Hargreaves, who celebrated her eightieth birthday yesterday and made her little speech up at Columbia, is all that Alice's millions of devoted admirers would wish her to be.

Through the years she has kept the unassuming modesty and charm that made her Alice and that now make her a guest with who mthe country is delighted.

Instead of tiring her, may her visit add many years and happy memories to a life whose girihood is already immortal!—New York World-Telegram.

Had Cause To Wonder

A farmer south of London, Ontario, is wondering why calfskin shoes cost $6 or upward. The other day he killed the fatted calf, and took it, dressed, along with the skin, to market. The price for the meat was plenty low enough, he thought, but when he was offered five cents for the calf skin—it was the last straw. "Pretty soon we'll have to pay city people to take our produce," he remarked.

Penalty Was Heavy

Documents recently found in Scotland show that in 1400 the penalty for the killing of salmon "from the feast of the Assumption of the Virgin till Martinmas" was a fine equivalent to $25 for the first offence, and death for the third offence.

What is said to be the only watch in the world to run backwards has been developed by a San Antonio, Texas, watchmaker.

Raw cotton is the largest single item in the import trade of Japan.

He: "This remedy has cured my rheumatism."

She: "What a pity. Now we shall not be able to tell when the weather is going to change."—Buen Humor, Madrid.

Canada's Silver Production

British Columbia Contributes Largest Amount To Canada's Total Output

The Canadian silver production in 1931 was approximately 20½ million ounces, or 10.5 per cent. of the world's computed production of 196 million ounces. Canada has for many years ranked third amongst the silver-producing countries of the world, being exceeded by Mexico and the United States, the former contributing about 42 per cent. and the latter about 22 per cent. annually to the world's total production.

The silver mines of Cobalt and adjoining areas in northern Ontario were for many years the principal source of the Canadian production, but their output in recent years has shown a gradual decline.

Important contributions to Canada's silver production are now being made by mines in the Noranda district of the Province of Quebec and in the Flin Flon district of the Province of Manitoba. The Yukon Territory has for several years been producing annually about four million ounces of silver, derived from the argentiferous lead ores of the Mayo district.

British Columbia is now the leading silver-producing province in the Dominion, having contributed about 39 per cent. of the total production in 1931. The silver is obtained mainly as a by-product in the treatment of the lead-zinc ores from the well-known mine at Kimberley.

Starts Record Bureau Of Farm Organizations

Survey Covers the Whole Of the Dominion Of Canada

A Central Bureau of Records of Farmers' Business Organizations is being established in Ottawa by the Economics Branch of the Dominion Department of Agriculture. The immediate aim of the Branch is to build up a statistical record of the number and location of such organizations, to ascertain the number of farmers marketing their products co-operatively and to obtain reliable information on the volume of business handled in this way.

This survey of farmers' organizations covers the whole of the Dominion of Canada. For a number of years the Department of Labour has collected and published information concerning the activities of co-operative organizations. By mutual agreement the Economics Branch is now the collecting agency. The Provincial Governments are also co-operating in this work in various ways in order that duplication of effort may be minimized.

With these records as a basis for study the Branch will be in a position to make an analysis of the organization and financial structure of the various co-operatives which will be available to those interested in their development. The Branch will thus provide a directory and will become a consulting agency for farmers' business organizations.

India Needs Firm Hand

Country Is Not Yet Ready For Home Rule

Hindu-Moslem riots in Bombay, which in three days numbered 60 dead and 700 injured, are on a small scale, a sample of the disorders which might be expected to become more general if India were at present accorded the home rule for which the Nationalists clamor. Without the firm hand of British rule, the violently antipathetic religious and racial elements would make India a shambles.

The police have been criticized for delay in quelling the riots. Possibly if they had met the situation more vigorously in its earlier stages they would have been criticized for using unnecessarily harsh methods. Their only recourse is to meet violence with force and to carry on in their difficult task of impressing upon fanatics the idea that there is a governing authority which will not tolerate murder and looting.

Mosquito Bite Cure

The Entomological Branch of the Dominion Department of Agriculture in Pamphlet 55-N.S., supplies the following remedy for mosquito bites: The most satisfactory remedial substances known are household ammonia and tincture of iodine, while many find glycerine or alcohol effective. Some medical authorities advocate the use of ordinary toilet soap, which is moistened and rubbed gently over the puncture after which the irritation soon passes away.

Preparing For Conference

Preparations for the Imperial Economic Conference are going forward. A sub-committee of the Dominion cabinet and four committees made up largely of departmental experts, have been constituted to arrange for the empire meeting.

Physicists at the University of Michigan have found evidence that the variable stars may brighten and dim as the result of wave movements in the electrically charged particles which compose the star.

A St. Louis hospital has an operating room for children, decorated with bright pictures of fairy tales.

Federal-owned railways in Austria have built 4,443 homes for employees.

Speed Of Aeroplane

Man Can Now Travel By Plane Faster Than a Bullet

Man is able to travel today with the speed of a bullet. When Flight Lieutenant Stainforth of the British navy, winner of the 1931 Schneider trophy race, made a speed for the first lap of 416.2 miles an hour, he actually went faster than the maximum speed of a bullet from a British service revolver.

This bullet has a muzzle velocity of 600 feet a second, or 409.09 miles an hour. Therefore, if a revolver were fired just as the flyer passed, in theory the bullet might be expected to travel along beside the ship, and the flyer might feel safe in reaching out and touching it, or even putting it in his pocket while it was still proceeding at full speed.

The flyer's speed might also be said to have been faster than the average speed of a Springfield rifle bullet, says Popular Mechanics Magazine. Such a missile leaves the muzzle at 2,653 feet a second, equal to 1,808.9 miles an hour, and its average speed over its effective range of 1,000 yards is 1,270 miles an hour. However, after the bullet has covered its effective range, it floats on and on, until, slowed down by air resistance, it drops to the ground spent. At the end of its flight, it has very little speed, and if the average is taken, it is found to be less than for the 'plane at top speed. The bullet would win, however, if the 'plane's speed were averaged in the same way.

Long Feud Ended

Peace Restored Between Scotch Clans After 187 Years

The Campbells and MacLeans are at peace after a feud of 187 years.

A telegram from the Duke of Argyll, chief of the Clan Campbell, to Col. Sir Fitzroy MacLean, head of all the MacLeans, who celebrated his 97th birthday on the Isle of Mull, Scotland, brought about the reconciliation.

"The Campbells and the MacLeans are now friends again. The sword is buried forever. Colonel MacLean said after receiving the telegram. The feud started in 1745 when the chief of the MacLean Clan suspected his wife of intrigue with one of the Clan Campbell.

DECIDEDLY SMART DAY DRESS FOR MATRONS OR ANYONE WHOSE FIGURE NEEDS SLIMMING

You'll love this dress. It is printed crepe silk in black and white.

It has the lines which have been proven by experience are becoming to the heavier figure. It also has the new modish sleeve flounce and is quite one-sided about its white crepe rever, that provides so much smartness and charm.

It is especially fascinating in navy blue plain crepe silk with white trim.

Style No. 672 is designed for sizes 36, 38, 40, 42, 44 and 46 inches bust. Size 36 requires 3⅞ yards of 39-inch material with ½ yard of 39-inch contrasting.

For summer, novelty cottons with a woollen aspect, linen and tub silks are ideally suited to this model.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

JONES (hot and tired, to neighbor's son): "Hullo! Father wants to borrow something as usual, I suppose?"

BOY: "Yes, please, Mr. Jones. He says, could you 'bligе him with the loan of a corkscrew?"

JONES: "A corkscrew! Certainly! You run along, Bobby—I'll bring it myself."—The Humorist, London, England.

Information To Farmers Re Credit Extensions

Saskatchewan Government Provides For Temporary Curtailment Of Remedies In View Of Conditions

The following information is published by the authority of the Hon. W. C. Buckle, Minister of Agriculture of the Government of the Province of Saskatchewan.

Taxes: Title to land sold for taxes will not be issued until June 15th, 1932, unless the municipality or council has exempted the land from the provision of the Act passed for the protection of land owners. Under the new Act authorizing the postponement of Issue of Certificate of Title to Land sold for Taxes, any owner of land lying within a municipality sold for taxes in 1929, or in any preceding year, in respect of which a certificate of title has not been issued, may make application to the council of the municipality within which the land lies for a certificate postponing the issue of certificate of title to the land until the thirtieth day of November, 1932. If the council fails or refuses to grant the application and to issue the certificate of postponement, the owner may apply to a judge of the district court for the required certificate, and the decision of the judge in the matter shall be final. If you are unable to take an appeal before a Judge of the District Court, you may ask the Debt Adjustment Commissioner for assistance.

If your land has been sold for taxes in the year 1929, or any preceding year, you are advised to consult the Secretary-Treasurer of your Rural Municipality, or Council, without delay, because after June 15th, if a certificate is not issued to you, title to your land may pass to the purchaser of the tax sale certificate.

The following real and personal property of an execution debtor and his family is free from seizure by virtue of all writs of execution, namely:

1. The necessary and ordinary clothing of himself and his family.

2. The furniture, household furnishings and dairy utensils, to the extent of five hundred dollars.

3. The necessary food for the family of the execution debtor during six months, which may include grain, flour, vegetables and meat either prepared for use or on foot.

4. Four oxen, horses or mules, or any four of them, six cows, six sheep, four pigs, and fifty domestic fowls besides the animals the execution debtor may have chosen to keep for food purposes, and food for the same for the months of November, December, January, February, March and April, or for such of these months or portions thereof as may follow the date of seizure provided such seizure be made between the first day of August and the thirtieth day of April next ensuing.

5. The harness necessary for four animals, one wagon or two carts, one mower or cradle and scythe, one breaking plough, one cross plough, one set of harrows, one horse rake, one sewing machine, one reaper or binder, one set of sleighs and one seed drill.

6. The books of a professional man.

7. The tools and necessary implements to the extent of two hundred dollars used by the execution debtor in the practice of his trade or profession.

8. Seed grain sufficient to sow all his land under cultivation not exceeding one hundred and sixty acres, at the rate of two bushels per acre, defendant to have choice of seed and fourteen bushels of potatoes for planting.

9. The homestead, provided the same be not more than one hundred and sixty acres; in case it be more the surplus may be sold subject to any lien or encumbrance thereon.

10. The house and buildings occupied by the execution debtor and also the lot or lots on which the same are situated according to the registered plan of the same, to the extent of three thousand dollars.

In the event of a chattel mortgage having been given covering horses, machinery, etc., the debtor is still protected under the Exemptions Act for the chattels mentioned above. Should the subject matter of the judgment upon which an execution is issued, represent the amount due on machinery, horses, etc., then such articles are not exempt.

In view of prevailing conditions, the Government of the Province of Saskatchewan deemed it necessary to provide for the temporary curtailment of remedies for the enforcement of payment of certain debts and therefore enacted the Debt Adjustment Act, 1932. This Act extends protection to residents of the province who are actual residents of and personally bona fide engaged in, or the principal part of whose income is derived from farming operations in the province, or urban residents who own their residence, or who are purchasers of their residence under an agreement for sale, or who are retail merchants and includes the executors or administrators of deceased residents if the beneficiaries or any of them are resident of the province.

This Act is for the purpose of assisting debtors who are having difficulties with their creditors. The Commissioner, who administers the Act, endeavours to settle such difficulties but in the event of it being impossible to arrive at an amicable settlement, the Commissioner is authorized to issue a certificate which would stop any legal action brought by the creditor leading to the seizure of chattels under chattel mortgage, foreclosure of mortgages, and cancellation of agreements for sale, also repossession of articles bought under conditional sale agreements and lien notes. The Act, however, does not apply to actions which have been decided before the case is referred to the Debt Adjustment Commissioner. It does, however, apply to foreclosure actions, cancellation of agreements for sale, etc., where final order has not been issued by the courts.

In the event of a certificate being issued, the resident must comply with the Commissioner's directions as to the disposition of his property.

The Commissioner of the Debt Adjustment Act is authorized to act as Custodian and Trustee under the Bankruptcy Act and if any farmer is so badly involved that there are no prospects of his being able to pay his debts, then the Commissioner can arrange for bankruptcy proceedings. The farmer is required to make a deposit of an amount which will take care of the cash disbursements, but no fees are charged for services of the Department.

The rights of mortgagees under crop leases are also restricted this year in that no lease shall affect more than one-third of the crop unless the mortgagee has purchased the seed and pays the cost of threshing and a share of the cash rental of the farm proportionate to the share of the crop to which he is entitled under the mortgage. A farmer who is a lessee, purchaser or mortgagor under any lease, agreement of sale or mortgage, may in the year 1932, out of the share of the crop belonging to the lessor, vendor or mortgagee, pay one year's taxes upon the land on which the crop is grown, and, in such case, upon production of the receipt of the municipality for such payment, the lessor, vendor or mortgagee shall be entitled only to his one-third share of the crop less the amount shown upon such receipt.

Seizures under any lien agreement, or conditional sale agreement under the Farm Implements Act, or the Conditional Sales Act, must be made by the sheriff of the judicial district within which the seizure is to be made, or under his direction. Generally, this applies to articles bought on the time payment plan such as farm machinery, automobiles, washing machines, cream separators, horses and cattle.

The vendor's right to recovery of unpaid purchase money on articles sold after April 13th, 1932, on credit or partly for cash and partly on credit, and if the vendor has a lien thereon, is restricted to his lien upon the articles sold and his right of repossession of such articles unless in the case of sale of land with chattels upon an entire consideration. In other words, if you buy a plow on the time payment plan and cannot meet the payments, the vendor can repossess the plow, but cannot take action against you for the unpaid balance.

The Debt Adjustment Act does not afford protection to urban dwellers who live in rented houses or apartments.

Information regarding the rights and remedies of debtors will be cheerfully given by Commissioner, Debt Adjustment Act, Regina.

Used Right Bait

A widow, the owner of a small shop, was usually escorted home by an admirer who carried the cash-bag containing the day's takings. It was always heavy.

"You must be doin' weel," said the man frequently.

"Oh, ay," the widow would reply, "it's a guid business!"

But she did not disclose the fact that besides the moderate takings the bag contained the counter weights The canny lover only discovered that fact after marriage.

Cheese Exports Increase

Cheese exports from the port of Montreal, to May 10, reached a total of 906,185 lbs. as compared with 653,820 lbs. for the corresponding period last year. Exports of cheese last year totalled 84,788,400 lbs., with the United Kingdom taking 80,565,500 lbs.

Jones: "But I thought your daughter was engaged to that promising young author."

Smith: "Yes, but he didn't keep his promise."

Fermentation is involved in the preparation of all kinds of cheese.

Argentina will have a national highway.

Disabilities Of Government

Administrations Face Great Difficulties Under Economic Stress

There was a time, not long ago, when democratic governments faced simple issues. So long as the problems before electorates had to do mainly with extension of the suffrage, with the removal of religious disabilities and with the breakdown of inherited privilege, the voter was confronted with a limited number of straightforward questions, to which, by marking his ballot appropriately, he replied with a plain "yes" or "no." The questions themselves were within his comprehension; his answers could, with no great difficulty, be translated into law.

Today this is no longer so. The most important questions, which governments and the peoples who support them now face, are not political but economic. They are concerned, not with the suffrage, but with the direction of industry; not with religious disabilities, but with the gold standard; not with inherited privilege, but with restrictions upon the freedom of trade. Anything that is done with reference to these problems involves intricate and detailed questions of administration. Whatever decisions are made and carried out, the reactions to them are complex and affect every detail of the national life. The most important consequences of any policy may well prove to be, not those that were foreseen by the framers of policy but those that were unexpected.

The successful working of democratic institutions is thus infinitely more difficult at present, alike for the voters and their representatives, than at any time since democratic government began. A system that functioned with comparative ease and smoothness in the 19th century, now functions under great strain in the 20th. In a number of western countries, young and old, in Europe and elsewhere, democracy has been succeeded by dictatorship. Democratic institutions are still intact in many countries. But even in certain of these, it is becoming increasingly clear that legislative machinery, designed for the formulation of public opinion in normal times on issues not of an emergency character, gives insufficient scope to leadership in a great economic crisis.—"Monthly Review," Bank of Nova Scotia.

Recipes For This Week

(By Betty Barclay)

COFFEE BAVARIAN CREAM

One tablespoon gelatine, ¼ cup cold water, 1 pt. whipping cream, ½ cup sugar, ½ cup strong boiled coffee, 1 teaspoon vanilla, 1 tablespoon lemon juice, a pinch of salt. Soak gelatine in cold water 5 minutes. Dissolve in hot coffee, then add sugar. Set bowl containing mixture in pan of cold water and stir until it begins to thicken. Add cream, beaten until stiff, and flavoring. Turn into wet mold and chill.

JELLIED TONGUE

Wash and scrub a beef tongue in salted water and boil until tender. Remove skin and place the tongue in a saucepan. Add two onions, one stalk of celery, four cloves, and salt and pepper. Cover with liquor in which tongue was boiled. Add one blade of mace, one bunch of thyme, one bunch of parsley and one teaspoon sugar. Simmer for two hours. Remove tongue. For each pint of the liquor add one tablespoon of gelatine that has been soaked in cold water. Stir for two minutes over very low flame. Strain and pour over tongue. Chill thoroughly, garnish with watercress, and serve.

Memorial Cairn

Danes and Norwegians To Erect Memorial At Churchill

Danes and Norwegians of the Lutheran faith are planning to erect a memorial cairn at Churchill to the memory of Captain Jens Munk and his party of 66 men who founded "Winterhaven" on the shores of the Hudson Bay in 1619, according to information received by the Free Press from Rev. B. M. Hofrenning, of Pine Creek, Minn.

According to Mr. Hofrenning, who has been commended by the Manitoba Government for his historical research in connection with the founding of this settlement, Captain Munk was sent out by King Christian the Fourth of Denmark and Norway in 1619. With the party was Chaplain Rasmus Jensen Aarhus, the first Lutheran pastor to set foot in America. Along with 60 of the party, the pastor died of disease during the winter of 1620, leaving Captain Munk and two men, the survivors of the ill-fated expedition.—Winnipeg Free Press.

When vegetables are cooked, 50 per cent. of the mineral content is transferred to the cooking water, and therefore this water is useful in soups, gravies and other foods.

Saskatchewan produced 329,209 tons of coal in the first four months of 1932, or approximately 100,000 tons more than in the same period in 1931.

Magnesium powder is used for fireworks and illumination bombs.

Wheat Quotas

Saskatchewan Producers Submit Findings For Presentation To Imperial Conference

Care in deciding on a policy of import quotas in wheat for Britain at the coming Imperial Conference is urged by Saskatchewan producers.

Neither for or against wheat quotas, recommendations to the provincial government from the recent conference of producers in connection with the Imperial Conference asked "careful consideration" by Canada's delegates on this point.

The findings of Saskatchewan's producers were announced by Hon. M. A. MacPherson, Provincial Treasurer. Armed with the information received from agricultural interests, the Saskatchewan government will meet representatives of other western governments for the purpose of drawing up western Canada's brief for the guidance of Canada's delegates to the Imperial Conference.

Full proposals of the committee were: (1) An investigation of the possibilities of a stabilizing Empire currency. (2) The encouragement of a maximum exchange of Canadian agricultural products for British manufactured goods. (3) The safeguarding of the home market for agricultural products so far as is consistent with satisfactory inter-Empire trade relations. (4) A continuance of the Empire marketing board. (5) Encouragement of the use of the port of Churchill and the Hudson Bay Railway. (6) Careful consideration of any proposal for the establishment of import quotas for wheat. (7) Extension of the same privileges and consideration to Canadian cattle as accorded to other parts of the Empire. (8) Consideration of elimination of export bonuses in the dairy industry, or in the alternative, provisions to offset the effects of same. (9) Benefits to be accrued from the development of a trade in bacon, hams, pork and pork products.

Impressed With Nation's Port

Party Returns From Churchill Full Of Praise For Facilities Provided

L. B. Cusick, Canadian president of the Continental Grain Company, and party, returned from Churchill full of praise of the mechanical facilities of the Hudson Bay route and firm believers in the possibilities of the new north line for importing and exporting.

Included in the party were C. E. Taylor, of Duluth, Minn., and John B. Fisher, of Winnipeg, of the Scottish Co-Operative Society.

"The roadbed to Churchill is as well ballasted as any I have seen. There are plenty of sidings along the line to the north port. The elevator at Churchill is as modern as any in Canada and there should be no difficulty in handling grain out of Churchill for years," said Mr. Cusick. He thought the Department of Railways and Canals should be congratulated on the fine elevator at Churchill and the C.N.R. on the finely built Hudson Bay Railway.

The weather was ideal, the mercury mounting to around 70 degrees. Mr. Taylor, of Duluth, was quite impressed with the grain handling facilities of the northern port. "If the port develops the way I expect it to, more storage facilities will be necessary," he declared.

The first boat will come into Churchill in August. Five boatloads will be the minimum handled by the Continental Grain Company, that purchased the two million bushels of wheat from the wheat pool. Another shipload will be sent to Churchill by the Dreyfus Company, of Paris, France. Mr. Cusick expects to return to Churchill in August when the first boat comes into the north port. While he has no definite plans for the immediate future in regard to the use of the Hudson Bay route, Mr. Fisher, representative in Canada for the Scottish Co-Operative Society, is watching with the keenest interest the development of the bay route. While nothing is settled, there is the possibility his company will export from Canada to Scotland over the line.

Dr. Jacob Grimm of Germany says there is no language so well suited for the world-language as the English, it having the marvellous capacity of adapting itself to the beauties of other languages.

The only way in which a man may indulge in a lottery in this country is to step up to the altar and say: "I will."

Canadian production of tobacco in 1931 totalled 51,300,000 pounds valued at $7,177,540.

"I would like to give you a good reference but you were never punctual with the meals."

"Well, say she prepared the meals with as much punctuality as she received her wages."—Wahre Jakob Berlin.

You are sure to love the way it cares for *your* skin! The caress of dollar-a-cake French soap for just 10c.!

THE HOUSE OF DREAMS-COME-TRUE

— BY —

MARGARET PEDLER

Author Of "The Splendid Folly," "The Hermit Of Far End."

Hodder & Stoughton, Ltd., London.

CHAPTER XXII.—Continued.

Burke fitted the key into the lock of the door and turned it sulkily.

"You prim little thing! I was only teasing you," he said. "Do you mean you're really as frightened as all that of—what people may say? I thought you were above minding gossip of ill-natured scandalmongers."

Jean grasped eagerly at the excuse. It would serve to hide the real motive of her impulsive action.

"No woman can afford to ignore scandal," she answered quickly. "After all, a woman's happiness depends mostly on her reputation."

Burke's eyes narrowed suddenly. He looked at her speculatively, as though her words had suggested a new train of thought, but he made no comment. Somewhat abstractedly he opened the door and allowed her to pass out and down the stairs. Outside the door of the inn they found the mare and dog-cart in charge of an ostler.

"The mare's foot's rather badly torn, sir," volunteered the man, "but the blacksmith thinks she'll travel all right. Far to go, sir?"

"Nine or ten miles," responded Burke laconically.

He was curiously silent on the way home. It was as though the chain of reasoning started by Jean's comment on the relation scandal bears to a woman's happiness still absorbed him. His brows were knit together morosely.

Jean supposed he was probably reproaching himself for his conduct that afternoon. After all, she reflected, he was normally a man of decent instincts, and though the flood-tide of his passion had swept him into taking advantage of the circumstances which had flung them together in the solitude of the little inn, he would be the first to agree, when in a less lawless frame of mind, that his conduct had been unpardonable. Although, even from that, one could not premise that he would not be equally culpable another time!

Blaise had proved painfully correct in his estimate of the dangers attaching to unexploded bombs. Jean admitted it to herself ruefully. And she was honest enough also to admit that, with his warning ringing in her ears and with the memory of what had happened in the rose-garden to illumine it, she herself was not altogether clear of blame for the incidents of the afternoon.

She had played with Burke, even encouraged him to a certain extent, allowing him to be in her company far more frequently than was altogether wise, considering the circumstance of his hot-headed love for her.

It was somewhat of a mental start of surprise that she found herself seeking for excuses for his behaviour—actually trying to supply adequate reasons why she should overlook it!

His brooding, sulky silence as he drove along, mile after mile, was not without its appeal to the inherent femininity of her. He did not try to excuse or palliate his conduct, made no attempt to sue for forgiveness. He loved her and he had let her see it; manlike, he had taken what the opportunity offered. And she didn't suppose he regretted it.

The faintest smile twitched the corners of her lips. Burke was not the type of man to regret an unlawful kiss or two!

She was conscious that—as usual, where he was concerned—her virtuous indignation was oozing away in the most discreditable and hopeless fashion. There was an audacious charm about the man, an attractiveness that would not be denied in the hot-headed way he went, all out, for what he wanted.

Other women besides Jean had found it equally difficult to resist. His sheer virility, with its splendid disregard for other people's claims and its conscienceless belief that the battle should assuredly be to the strong, earned him forgiveness where, for misdeeds not half so flagrant, a less imperious sinner would have been promptly shown the door.

But no woman—not even the women to whom he had made love without excuse of loving—had ever shown Burke the door or given him the kind of treatment which he had thoroughly well merited twenty times over. And Jean was no exception to the rule.

At least he had some genuine claim on her forgiveness—the claim of a love which had swept through his very being like a flame, the fierce passion of a man to whom love means adoration, worship—above all, possession.

And what woman can ever long remain angry with a man who loves her—and whose very offence is the outcome of the overmastering quality of that love? Very few, and certainly none who was so very much a woman, so essentially feminine as Jean.

It was in a very small voice, which she endeavoured to make airily detached, that she at last broke the silence which had reigned for the last six miles or so.

"I suppose I shall have to forgive you—more or less. One can't exactly quarrel with one's next door neighbour."

Burke smiled grimly.

"Can't one?"

"Well, there's Judith to be considered."

A rather curious expression came into his eyes.

"Yes," he agreed. "There's Judith to be considered." There was a hint of irony in the dry tones.

"It would complicate matters if I were not on speaking terms with her brother," pursued Jean.

She waited for his answer, but none came. The threatened possibility contained in her speech seemed to have fallen on deaf ears, and the silence seemed likely to continue indefinitely.

Jean prompted him gently.

"You might, at least, say you are sorry for—for——"

"For kissing you?"—swiftly.

"Yes"—flushing a little.

"But I'm not. Kissing you" — with deliberation—"is one of the things I shall never regret. When I come to make my peace with Heaven and repent in sackcloth and ashes for my sins of omission and commission, I shan't include this afternoon in the list, I assure you. It was worth it—if I pay for it afterwards in hell."

He was silent a moment. Then:

"But I'll promise you one thing. I'll never kiss you again till you give me your lips yourself."

Jean smiled at the characteristic speech. She supposed this was as near an apology as Burke would ever get.

"That's all right, then," she replied composedly. "Because I shall never do that."

He flicked the chestnut lightly with the whip.

"I think you will," he said. "I think"—he looked at her somewhat enigmatically—"that you will give me everything I want—some day."

CHAPTER XXIII.

On the Side Of the Angels

Throughout the day following that of the expedition to Dartmoor, Nick seemed determined to keep out of Jean's way. It was as though he feared she might force some confidence from him that he was loth to give, and, in consequence, deliberately avoided being alone with her.

On the second day, however, as luck would have it, she encountered him in the corridor just outside her own sitting-room. He was striding blindly along, obviously not heeding where he was going, and had almost collided with her before he realized that she was there.

He jerked himself backwards.

"I beg your pardon," he muttered, still without looking at her, and made as though to pass on.

Jean checked him with a hand on his sleeve. She had not watched the dogged sullenness of his face throughout yesterday to no purpose, and now, as her swift gaze searched it anew, she was convinced that something fresh had occurred to stir him. It was impossible for Jean to see a friend in trouble without wanting to "stand by."

"Nick, old thing, what's wrong?" she asked.

He stared at her unseeingly.

"Wrong?" he muttered. "Wrong?"

"Yes. Come in here and let's talk it out—whatever it is." With gentle insistence she drew him into her sitting-room. "Now," she said, when she had established him in an easy-chair by the open window and herself in another, "what's gone wrong? Are you still boiling over about that trick Sir Adrian played on Claire the day of the picnic?"

She spoke lightly—more lightly than the occasion warranted—of set purpose, hoping to reduce the tension under which Nick was obviously labouring. His face hurt her. The familiar lazy insouciance which was half its charm was blotted out of it by some heavy cloud tragic significance. He looked as though he had not slept for days, and his eyes, the gaiety burnt out of them by pain, seemed sunken in his head.

He stared at her blankly for a moment. Then he seemed to awaken to the meaning of her question.

(To Be Continued.)

HER FAT HAD TO GO

Activity Melted It

Exercise is the enemy of fat. If you are overburdened with superfluous flesh, call up reserves of energy to fight it. Do as this lady did:—

"During the past six months, I have made steady improvement whilst taking Kruschen Salts. I have reduced 28 lbs. in weight during that period, and have benefited greatly from greater agility and liveliness—all directly attributable to that famous preparation."—Mrs. W. P.

You can take off fat with Kruschen Salts if you will take one-half teaspoon in hot water every morning before breakfast, modify your diet and exercise regularly.

While you are losing fat you will be gaining in energy—in endurance—in ambition. Your skin will grow clearer, and your eyes will sparkle with the good health that Kruschen brings. The old arm chair won't hold you any more—you'll want to be up and doing—you'll enjoy work and active recreation and you'll sleep like a top. You'll lose fat, and probably live years longer.

Needed Many Licenses

Britishers Find Setting Up Private Zoo Is Difficult Matter

If you contemplate setting up a private zoo, take the advice of the promoters of the Surrey Zoological Gardens, Chessington, and don't!

Their case is a striking example of the labyrinth of red tape which has to be negotiated before the private citizen is permitted to embark on any enterprise.

Before they got going the Chessington Zoo authorities had to take out sixteen licenses. They were:—

A license to keep a zoological gardens, granted by the Epsom Rural District Council.

A license to keep animals in quarantine, granted by the ministry of agriculture.

A license to sell wines and spirits with meals.

A license to sell tobacco.

A license to sell refreshments.

A license to install a petrol pump.

A license to keep dogs.

A license to keep revolvers.

A license to keep a gun.

A license for music and dancing.

A license to play music, granted by the Performing Rights Society.

A license to have temporary sheds.

A license to have boards outside advertising the fact that it is a zoo, even though the boards are on their own property.

A license in connection with entertainment tax.

A motor car license.

A driving license.

So far no license is required for putting the monkeys to bed.

Explore Stratosphere

Prof. Piccard May Go Aloft In Northern Canada

Prof. Auguste Piccard, of Zurich, Switzerland, who last year ascended more than 10 miles into the outer atmosphere, announces that he may decide very shortly to make his next trip into the stratosphere with the Belgian physicist, Cosings. Prof. Piccard expressed a desire to go aloft from a North American point, possibly in Canada, to study the influence of the magnetic pole on cosmic radiation.

'Plane Lands In Crater

Father Bernard B. Hubbard, the Glacier priest, said hot currents from the erupting vents in the Aniakchak volcano crater in Alaska, literally lifted Pilot Frank Durbandt's 'plane out of the depths of the crater four days ago. A landing was made inside the great volcano on a small lake and the party spent five hours on the crater's floor.

Stupidity with a shut mouth often gets by as wisdom.

Underweight?

"My baby was so thin his hands were like bird claws. But he thrived wonderfully after I started giving Baby's Own Tablets," writes Mrs. L. Kennedy, Portland, Ontario.

Baby's Own Tablets help to regulate stomach and bowels; and the thin child gains weight. Absolutely safe. 25c package. 233

Dr. Williams'

BABY'S OWN TABLETS

Care Of Veterans

Funds Available For Soldiers Who Suffered In German Prison Camps

Reports have reached veterans' organizations in various centres that there is no money in the reparations treasury for Canadian veterans who suffered ill-treatment in German prison camps, whereas the sum of $300,000 was granted to naturalized Armenians who lost relatives and property in the Turkish massacres. It was explained at the secretary of state department, that these reports are not accurate. A vote of $300,000 was put in the estimates last session to look after the Canadian veterans who suffered in German prison camps. That amount is available.

Under the Lausanne treaty it was arranged by Great Britain, France, Italy and Japan that the 5,000,000 in Turkish pounds, credit of Turkey in Germany, be used to reimburse the Armenians who suffered in the massacre. A commission sat in Paris and adjudicated on these claims.

Claims to the total of over $8,000,000 were filed at Ottawa by Armenians in Canada who had become British subjects and who had lost property, fathers or mothers or wives or children in the massacre. Of these claims, the only ones to be entertained by the Paris commission were those whose wives or children had been lost, in which cases certain solatia were granted.

The remainder of the claims were turned back to Ottawa, and for years the government struggled with the problem as to what should be done with them. It was finally decided to award these claimants a total of $300,000 taken out of the full vote of $3,200,000.

Good Thing For Canada

That Emigration Of Her Citizens To United States Is Stopping

There is real cause for gratification in the report from Washington that Canadian immigration into the United States is drying up. For March this year only 234 native-born Canadians were granted immigration visas to enter the United States, as against 3,155 for the corresponding month of 1931.

The cause of this decline is attributed by the State Department at Washington to the enforcement by American Consuls in Canada of the "likely to become a public charge" provision of the U.S. immigration laws. Thus, it is shown that whereas during the first eighteen months of the application of the provision, 10,303 visas were issued, for the previous eighteen months, 73,414 visas were issued. The decrease is 86 per cent.

Whatever the cause, it is satisfactory to note that the drain of Canadian citizens to the United States is stopping. This country needs to keep its citizens upon Canadian soil, and one of the most discouraging factors in the past has been the steady trek of young people particularly across the border. That many have returned years later to renew their Canadian citizenship has not compensated for their absence.

Canada needs men to develop its natural resources. We need our youth to give this country the best of their service and ability. If the American immigration laws are helping us to retain them, then we have good reason to be grateful to the United States.

Hard To Grow Trees

Climate Of the Earth, On the Whole Not Favorable To Forest Growth

Most people do not realize that the climate of the earth as a whole is unfavorable to forest growth. Eighty per cent. of the land on this earth is too high, or too dry, or too cold to support a commercial forest. Forests really have a hard time to maintain themselves in this world. You wouldn't think that, would you, by the way we treat them? It is really only on comparatively narrow coastal strips of the continents, and on oceanic islands, where rainfall is high and the temperature in the growing period is relatively high, that forests have an easy time in maintaining themselves. On the greater portion of the earth it is nip and tuck whether the forests or grasslands and deserts will prevail.—Dr. Clifton D. Howe, University Of Toronto.

Douglas' Egyptian Liniment is especially recommended for spider, or infection of cow's teat. Invaluable also in cases of spavins, curbs and splints.

A New War Weapon

Machine-Gun Rifle Shoots From 400 To 500 Bullets a Minute

Machine gun rifle which may replace the present type of hand rifle used by the British army, has been tested satisfactorily. It shoots 400 to 450 bullets a minute and can be fired from the shoulder like the ordinary rifle from a kneeling position or any other necessary. The weight is approximately a few pounds more than the ordinary rifle, but half that of the machine gun now used.

A new and important safety device for coal miners is a glass tube containing palladium chloride, which turns dark if dangerous gases are escaping.

Switzerland imported $1,608,561 worth of office appliances last year.

Fertilizer Industry

Sixty-Five Per Cent. Grain Is Shown In Figures For 1931

Despite prevailing business conditions, the fertilizers industry gained 65 per cent., while the manufacture of toilet preparations, flavoring extracts, polishes and dressings showed small increases during 1931, it was revealed in the report prepared for "Canadian Chemistry and Metallurgy," by W. H. Losee, chief of the mining, metallurgical and chemical branch, Dominion Bureau of Statistics.

Given at McMaster University, where nearly 500 chemists from all parts of the Dominion are attending the annual convention of the Canadian Chemical Association, the survery for 1931 showed that capital employed in the chemical industry totalled $161,063,565, only four per cent. below the corresponding figure for 1930. Approximately 100,000 workers, or five per cent. of Canada's population, are dependent for their support on chemical manufacturers or chemical process industries.

"Forward To the Land"

New Scheme For Canada Is An Improved Idea

Canada proposes a new unemployed relief plan that will bring idle labor and idle land together. No more launching of public works to give jobs to the jobless, but instead, Dominion, provinces and municipalities would share in a colonization scheme for men willing to undertake an agricultural life. From $400 to $600 would be advanced to the new farmer, who would be aided and directed by a commission. If the provinces agree the Federal Government will start the plan immediately. This isn't the familiar "back to the land" scheme, says Labor Commissioner Gordon, but a "forward to the land" scheme—an improved idea with an improved promise of success.

A Remedy For Earache.—To have the earache is to endure torture. The ear is a delicate organ and few care to deal with it, considering it work for a doctor. Dr. Thomas' Eclectric Oil offers a simple remedy. A few drops upon a piece of lint or medicated cotton and placed in the ear will do much in relieving pain.

A Good Definition

Discussing Irish politics with friends after the close of the music festival, H. Plunkett Greene, adjudicator par excellence, and himself a son of Erin, defined Eamon de Valera, government leader in the Free State, as "a Spanish onion in an Irish stew."

Truck Competition In Britain

Truck and bus competition is estimated to have cost a loss of $80,000,000 in revenue to British railways last year.

for NEURALGIA

A good application of Minard's, according to directions, just "hits the spot". You'll find that you get wonderful relief!

MINARD'S "KING OF PAIN" LINIMENT

Passengers Drop From Airplane In Chairs

Demonstration Of New Method Ensuring Safety Was a Success

Four men were parachuted from an airplane in a demonstration of a new method to release passengers from distressed ships. All landed safely. They had cleared the ship in five seconds, Harry Trusty, a designing engineer, calculated.

In a cabin monoplane, 4,000 feet over the airport, at Santa Ana, California, the pilot pulled a lever. Two of the passengers were swung outward through doors in the fuselage and scudded off into the air, while parachutes blossomed above their heads.

The pilot pulled a second lever. The other two passengers swung through two more doors, and the parachutes automatically took them in tow. All four landed sitting on the same seats they occupied in the 'plane.

Mr. Trusty describes the device:

The doors in the sides of the fuselage open automatically when the pilot pulls the lever. Davits swing outward with each seat and an automatic trip drops the seat once it has swung clear of the ship. The chutes are carried under the seats. A metal band slips around the waist of the passenger as the device begins to operate to discourage panic.

THE RHYMING OPTIMIST

By Aline Michaelle

YOUR MIRRORED SELF

What do you see in your fellow men,
Those whom you daily meet
In office, and store, and crowded car;
Those whom you pass in the street?

Bitterness, jealousy, pride and greed,
Folly and fierce disdain;
Are these the passions their looks reveal,
Hate, and its cruel train?

Glancing there, can you read instead
Purity, love and trust,
Finding in every stranger's eyes
Something serene and just?

What do you see in your fellow man?
Ere you reply, beware!
Part of the man you are yourself
Waits for you mirrored there!

Reno Divorces

Judges Have Put the Brakes On Hasty Divorce Seekers

Reno's judges have put the brakes on divorce seekers who attempt to slip through court in one day.

"The "slow-down" order was issued in a joint statement by Judges B. F. Curler and Thomas F. Moran, which announced the sun must set at least once between filing of suit and granting of decree. The judges declared the rule would not be waived under any consideration.

Unveils Book Of Remembrance

Prince George, on opening the St. Saviour's Memorial Chapel in Norwich Cathedral, "unveiled" a "Book of Remembrance" containing the names of 15,155 Norfolk men and 13 women, including Nurse Cavell, who lost their lives in the war.

Britain's rayon business continues to increase.

The greatest fault is to be conscious of none.

Little Helps For This Week

"Your heavenly Father knoweth that ye have need of all these things."
—Matthew vi. 32.

The dear God hears and pities all;
He knoweth all our wants;
And what we blindly ask of Him,
His love withholds or grants.

And so I sometimes think our prayers
Might well be merged in one;
And nest and perche, and hearth and church
Repeat, "Thy will be done!"
—John Greenleaf Whittier.

What Christ's prayer was, all true prayer must be; you must pray with the great prayer in sight. You must feel the mountains above you while you work upon your little garden. Little by little your special wishes and the eternal will of God will grow in harmony with one another; all conflict will die away, and the great spiritual landscape from horizon to horizon will be but one.—Lucy Larcom.

Oldest Graduate

Dr. Lovett Oldest Living Medical Graduate Of McGill University

Dr. William Lovett, who celebrated his 90th birthday at Paris, Ont., recently, is the oldest living medical graduate of McGill University, Montreal.

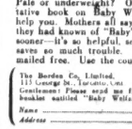

He graduated in 1870 and received the second diploma issued by the Ontario Medical Council. The late Dr. J. Dunsmore of Mitchell received diploma number one. Dr. Lovett's entire medical practice was carried on in the town of Ayr, Ont., from 1870 to 1907, when he retired on account of illness.

An Amazing Fact

One is amazed at the supineness of the United States in the face of organized crime. If a foreign nation were to invade that country and pull off just one of the stunts that are being constantly enacted by the gangsters, the whole country would throw all its money and man power into the task of cleaning up the situation. Yet it seems absolutely helpless in the face of internal disorders.

Auntie: "Well, John, and how do you like your new baby brother?"
Four-year-old John: "Asleep."

"You shouldn't be dissatisfied. Look at all you have."
"Yes, but look at all I haven't."

Spalding Symetric Irons, hickory shaft. Special price $2.75 at Morrison and Johnston, Ltd.

BALL TOURNAMENT AT MEADOWBROOK

There will be a baseball tournament at Meadowbrook on Saturday, June 25th. Teams taking part will be Meadowbrook, Lincoln, Iowalta, and Bismark. The tournament will start at 1:30. There will also be ladies' softball games.

YOUTH LOSES BOTH FEET UNDER MOVING FREIGHT

Gordon Pruyea, a 19-year-old boy from Trenton, Ont., fell under the East-bound freight train, about one mile from Lacombe on Wednesday and sustained injuries that necessitated the amputation of both his feet.

It appears that the lad was waiting at the railway crossing a mile East of Lacombe, when he attempted to board the moving train. The Engineer of the freight noticed him standing by the crossing, and saw him attempt to board. Noticing him fall, the train was brought to a stop, and it was found that the youth had both feet badly crushed. He was rushed to the Lacombe hospital by Dr. Hynes, where he went under an operation. One of his legs was removed below the knee and the other at the ankle.

It appears that the youth had travelled the freight car route, from Ont., and was making for Halkirk, where he was going to live with relatives, and was on the last lap of his journey when misfortune overtook him.

Latest reports from the hospital state that he is progressing as nicely as could be expected after his accident.

SPRUCEVILLE NEWS

We are glad that Mrs. E. C. Crooker, who was taken suddenly ill a week ago is steadily improving, and may be home the beginning of the week.

A number from Spruceville motored to Ponoka on Tuesday to attend the U.F.A. Convention held there. The convention was a wonderful success and all came home much benefitted by the days outing.

Mr. and Mrs. Boulter spent Sunday with Mrs. W. P. Young.

Remember the cheese demonstration to be held in the hall on Wednesday afternoon, June 29th, by the U.F.W.A. Everybody welcome.

GOLF NEWS

The Dunlop Golf Ball Tournament is progressing very well. The first round in groups A and B is completed, and nearly completed in group C. Any Group C. players who have not already played are asked to do so at once. The big upset in the Tournament so far was when Jack Morrison entered the semi-finals of group A by defeating the famous Tom Jackson. The following shows matches played in Groups A and B; group C will be given next week, when all matches are completed in this group.

G. T. Jakson beat F. D. Locke
Jack Morrison beat D. MacDonald.
S. Mutch beat J. S. McCormick
G. Dukelworth beat S. Wilson
W. N. Morrison beat C. A. Sneath
H. Henderson beat H. S. Trame
John MacDonald beat F O. Vickerson
H. Teare beat E. McCaugherty
C. N. Laverty beat G. J. Doherty
T. W. H. Thompson beat A. M. Campbell
Jack Halpin beat Theo. Hampson
R. L. Robson beat Pete Danner
R. Kamgiesser beat H. M. Trimble
W. T. Hynes beat M. Cruickshanks
P. W. Pratt beat Dr. Moore
D. F. Chisholm beat A. Belcher
D. Hay beat L. Winter

THE CHURCH OF ENGLAND IN CANADA

St. Cyprian's Church, Lacombe
Recor: Rev. T. H. Chapman
Organist: Miss Kathleen Walters L.A.B.
Assistant: Mrs. Norman Glasgow
Thursday, 23rd, 7 p.m. Boy's Choir Practice.
June 26th, 5th Sunday after Trinity
No Sunday School.
11:00 a.m. Flower Service.
7:30 p.m. Special Service for the Masonic Order. The Rev. W. T. H. Cripps, Rector of St. Luke's Church, Red Deer, Rural Dean of the Red Deer Deanery, and Past Grand Chaplain of the Masonic Order, will be the Special Preacher. Special music.

Monday, July 4th to Saturday, July 9th, the Sixth Annual Diocesan Summer School will be held at Banff. Regardless of whether you have, or have not been in Banff before, you cannot afford to pass up this wonderful opportunity of enjoying, at considerably less than moderate cost, the most ideal sort of holiday under perfect conditions. Be Sure to Register Not Later Than June 28th.

LINCOLN NEWS

The Rev. F. G. Mathews held service in Lincoln hall on Sunday 19th, and will continue to do so every Sunday at 8 p.m. until further notice.

The road across Lincoln slough is now completed with the exception of some finishing touches to the ditch. Messrs. McDermid, Kasha, Spink and Whitecotton are to be congratulated on a good job and we understand it was done for less than the estimated cost. Mr. Spink as timekeeper made an honest attempt to let all who gave their services free last winter a chance at the paid-for work. Well done "Jimmie" wish we had more of your calibre in the district.

Everyone turned out to the ball team's benefit on the 17th. The boys are glad to have a small surplus over after buying equipment. Some one has suggested that they pay a first instalment on an adding machine for the scorekeeper. Cheer up, boys! Rome was not built in a day.

The benefit for the School Fair comes off on July 29th. All willing to help in this deserving cause please get in touch with Mr. Buckholtz who wishes to state that the entertainment will take the form of an ice cream social and dance.

MEADOWBROOK NEWS

A very enjoyable evening was spent at the home of Mr. and Mrs. John Sauve, on the 14th of June, the event being their son, Eugene's 18th birthday. A very dainty supper was served, followed later in the evening by ice cream and cake. About midnight his friends departed wishing him many happy returns of the day.

The Ladies' Aid met at the home of Mr. and Mrs. J. Long on Saturday, June 11th. Quite a number of ladies were present and spent a very pleasant afternoon.

Mr. and Mrs. A. E. Riley and family were Sunday visitors at Mr. and Mrs. I. Riley's.

The Club met at Mr. and Mrs. Sauve's for the June meeting, next meeting to be at Mr. and Mrs. Jimmie Heath's on July 6th. Everyone welcome.

Mr. Carl Benson and Mr. Carl Christianson are drilling a well for Mr. Harry Long at present.

Rev. Mr. Wright, of Morningside is holding service in the United Church, on Sunday evening, June 26 at 8:30 p.m. Everybody welcome.

Rev. Mr. Dalby of Bentley is also holding service in the Meadowbrook school on June 26, at 8:00 p.m. he will be pleased to see as many as possible present.

Anyone wishing to see some very artistic work, both inside and outside the schoolroom should arrange to attend the school picnic to be held on the last afternoon of school, June 30. Come and see our teacher's work.

Remember the date of the Club picnic to be held on July 8th on the "Dickie Flat" on the Meadowbrook Baseball Diamond. Two baseball teams are to play and there is to be a game of softball and a good line of sports and races. This is to be a basket dinner. Everyone come and bring a basket or a "barrel" if you wish. There will be a good refreshment booth also. Everyone welcome so come and bring your friends.

Miss Lyla Carlson was visiting her mother for a few days this week.

This District is very lonesome since Miss Annie Macabosky and Miss Carlson have gone South. We hope they will come north again.

Mr. Jesse Huseby and family have moved over onto their new farm west of the Dickie place.

Mr. W. Richards and Mr. J. Sauve played for a dance at Homeglen last week and are going to play for another one there in the near future.

A number from here attended the dance at Lincoln and report a good time.

Mr. and Mrs. Clifford Unwin were visiting friends in this District on Sunday.

Mr. Russell Long was a visitor at his home this week.

Mr. W. Wiles was paying his parents Mr. and Mrs. Wesley Wiles a visit this week.

Mrs. Eddie Miller and Mrs. J. P. Miller, formerly of this place who has been residing with her son Archie in Winnipeg for the past while were visitors in this district last week.

MR. LUKENS LEAVING

Mr. T. R. Lukens, for some time business manager of Canadian Junior College, Lacombe, has accepted the same position at Broadview College, Chicago, and will take up his home there in the near future. He is holding a sale of all his household goods on Thursday, June 30th. For the convenience of the public, the sale will be held at Peter Swancton's Automobile Repair Shop, opposite B. S. Cameron's Studio, and will commence at 1:30.

Head Office MONTREAL

Above All . . . SECURITY

Established in every city and town of importance throughout the Dominion, the Bank of Montreal has been the trusted custodian of Canadians' savings for generations.

Throughout the Bank's history of 115 years, safety has been a watchword and conservative management a guiding principle of those directing the institution.

Customers of each of the more than 600 Branches of the Bank have the satisfaction of knowing that behind their own Branch, for the security of their deposits, are the full resources of the entire organization.

PRESBYTERIAL PICNIC

Approximately ninety persons, composing the W.M.S. members their husbands and friends, attended the Lacombe Presbyterial picnic held on June 15th at the United Church Camp, Meridian Beach, Gull Lake. Members were present from Bentley, Ponoka, Morningside, Clive, Spring Valley, Eclipse and Lacombe.

This picnic was held in honor of a most valued Presbyterial officer and ardent W.M.S. member, Mrs. G. Barbour, whose removal to Edmonton is a distinct loss to the Lacombe Society.

During the afternoon a short Executive meeting was held at which Mrs. W. C. Sweet was elected Treasurer in place of Mrs. Barbour, and Mrs. Aldwinckle was elected Secretary of C.G.I.T. work. Although at five o'clock rain began to fall in torrents, the large dining hall of the Camp, housed everyone comfortably and a delicious banquet and enjoyable social hour dispelled all thought of the downpour.

CLIVE CARNIVAL

The Women's Association of Clive United Church will hold a Carnival on Monday, July 4th and have prepared a splendid program of sports for the occasion. Everybody is invited.

LACOMBE LIBRARY

Copyrights added to Lacombe Public Library this week are the following:

A Tangled Web, by L. M. Montgomery; Judith Paris, by Hugh Walpole; Good Companions, Angel Pavement, by J. B. Priestley; Marmosa, by Baroness Orczy; Fate is a Fool, by Harriet Comstock; A Women with White Eyes, by Mary Borden; A Lantern in her Hand, by Bess Streeter Aldrich; The Fire Within, by George Gibbs; Mysterious Ways, by P. C. Wren; The Minion, by Sabatini; Fire of Youth, by Margaret Pedler; The Hungry Road, by G. U. Ellis; The Executioners, by V. Sackville West; Also The Jesting Army, by Raymond; The Uncertain Trumpet by Hutchinson; The Mysterious Dr. Fu Manchu, by Sax Rohmer, and several of Sapper's, including Bulldog Drummond series are among those placed on the shelves recently.

LIBERAL-PROGRESSIVES SWEEP MANITOBA

Winnipeg, June 19.—The triumph of Premier John Bracken's Coalitionists, at the polls last Thursday was recognized tonight as one of the most impressive ever given a party in Manitoba. With all but six of the 55 seats in the House decided, Liberal-Progressives command a full strength of 35 to 8 for the badly beaten Conservatives, five for the Independent Labor Party and one held by an Independent.

CLIVE NEWS

Miss Marjorie Harris, of Edmonton, is spending a couple of weeks with her parents, Mr. and Mrs. J. Bates.

Mrs. H. B. Scott arrived home after an absence of of one year, in California.

Mr. and Mrs. A. Heald spent the week end in Edmonton.

Rev. Leard gave an interesting talk Sunday, on the Rural Church, also Mrs. Coote and Mrs. A. P. Rainforth gave papers on Church work and Church Finances.

Don't forget the vacation school which will be held in the United Church in July. Any children in the district are welcome.

Mr. and Mrs. V. Lockerby, spent Sunday at the home of Mr. and Mrs. G. Vanderzyl.

The Women's Association of United Church, are holding a carnival on July 4th. See the bills for details.

The Morningside girls came to Clive on Saturday to play ball. They put up a good game, but Clive was a little too good for them. The score being Clive 19, Morningside 12

AVALON

"The Yellow Ticket", For dramatic production, based on Michael Morton's stage play, comes to the Avalon this week bringing the incomparable Elissa Landi to the screen in a role that is said to afford full rein to her great emotional and histrionic capabilities. She portrays the role of a young Russian peasant girl, who, when forced by circumstances to accept the Czar's badge of shame, becomes the pitiful victim of the relentless persecution of the Russian secret police.

Lionel Barrymore, one of the outstanding male stars of both screen and stage has the powerful role of the head of the secret police and Laurence Olivier, handsome young newcomer from London and Broadway stage appears as the American journalist enamored of Miss Landi.

COMING—Marlene Dietrich in "Shanghai Express", June 30, July 1 and 2.

Double Feature, Ken Maynard in "Alias the Bad Man" and Warner Baxter in "Surrender,", July 7, 8 and 9.

PUBLIC PREFERENCE IS THE BEST PROOF OF VALUE

MORE *people are buying* CHEVROLET SIXES *than* ANY *other car*

because Chevrolet gives more for the money

The new Chevrolet became Canada's largest selling automobile because it offered the public outstanding value in a low priced car. Today, Chevrolet is maintaining its lead in sales—because, with prices reduced and quality unchanged, Chevrolet *has increased its lead in value.* For the first four months of 1932, Chevrolet has outsold the *next* leading car more than two-to-one.

Drive a Chevrolet—how much *more* it offers than you can find elsewhere in the lowest price field. *Smarter styling* — Chevrolet emulates the modern lines and modish fittings of expensive custom cars. *Finer coachwork*—for Chevrolet, alone in its field, has bodies by Fisher, with their lasting, quiet hardwood-and-steel construction. *More advanced features*—because of Chevrolet's Free Wheeling, silent Synchro-Mesh gear shifting and many other up-to-date advantages. *A more economical engine*—because with its built-in smoothness, its speed and acceleration, the Chevrolet six-cylinder power plant *costs less to operate* than any other automobile engine of comparable size and power. *A more thoroughly proved product*—because no other 1932 motor car is backed by the satisfactory road-experience of so many thousands of owners.

A Greater Value than Ever—because you can enjoy all these advantages *today* in any of thirteen big, quality models—at reduced prices—and on small payments spread over a period of months.

DEMONSTRATIONS PROVE FACTS!

This is Chevrolet Demonstration Month. Call at our showrooms—or 'phone us for a car.

UNITED CHURCH NOTES

"A Friendly World" provided the theme for the regular meeting of the W.M.S. held at the home of Mrs. C. Danner on Tuesday, June 21st. Devotional exercises were led by Mrs. Sharpe, the lesson being of "Paul the Man who made good." Mrs. Layton also brought a splendid report of the Conference Branch meeting which was both inspirational and informative. Reports were given by the various Secretaries on the progress of their Departments.

A well attended meeting of the Baby Band was held at the Manse on Monday afternoon, under the auspices of Mrs. G. Ramsey, Superintendent. A short program was given, after which a snap shot was taken of the group and refreshments served. Fifteen more babies were enrolled and much interest created in this important department of W.M.S. work.

On Friday evening, June 24th, at 7:30 Preparatory service will be held in St. Andrew's Church.

On Sunday, June 26th, Communion of the Lord's Supper will be observed at 11:00 a.m. Sunday School will be held at 3:00 p.m. Mrs. Geo. P. Johnston will be soloist at the evening service.

The Congregational picnic will be held on Wednesday afternoon, June 29th, at Meridian Beach, Gull Lake.

The recital by the Choir on Sunday evening was much appreciated. Numbers included Ladies' quartettes, duets, solos and several selections by the entire choir. Deep regret is felt at the breaking up of our Ladies-quartette, which has not only given great enjoyment to Lacombe audiences, but has done much toward bringing to the attention of the public at large the attractive features of this community, as well as its influence as a musical centre.

The choir of St. Andrew's Church gathered at the home of Mrs. W. N. Morrison on Tuesday evening, to hold a surprise party in honor of Miss Helen Barbour and Miss Edith Sims, two prominent and popular members of the choir and the community, who are leaving Lacombe shortly. Miss Barbour was presented with a comport dish and Miss Sims with a silver basket, Mr. Barbour was given book ends.

Dr. G. M. Little, Red Deer Health Clinic, will be in Lacombe on July 5th and July 26th, from 2:00 to 3:00 p.m. to give the second and third doses of toxoid to those who had their first dose on June 17th.

Parents who missed the opportunity of bringing their pre-school children to clinic of June 17th, may bring them on July 5th, when Dr. Little will give them attention.

On Thursday last, June 2, at the Normal School, the members of the Normal and Practice staffs entertained at the tea hour in compliment to Miss Kathleen Reed, whose marriage will take place during the month. The reception hall was charmingly decorated with delicately shaded lilacs and large purple pansies. The principal of the Normal School, Mr. G. K. Haverstock, ably expressed the high esteem in which Miss Reed is held by her colleagues, and voiced an appreciation of the fine quality of her work during her five year's connection with the Practice School. A tangible token of the sincere friendliness of the members of the staffs toward Miss Reed took the form of a gift of flatware in sterling silver.

—Camrose Canadian

BENTLEY NEWS

Born: at the Bentley Hospital on June 15th, to Mr. and Mrs. Elmer Lewis, of Eckville, a son.

Miss Rose Gyori, of the Bentley Hospital Staff is away on a month's holiday.

On Saturday, a tea was held at the home of Mr. and Mrs. Evernden, in honor of Mrs. Moores, who is leaving Bentley for the East shortly.

The recital given by Theresa Siegel in the United Church was a big success. It is hoped that Miss Siegel will return to Bentley and give the audience another treat.

The Bentley Creamery is nearing completion. The building has been all painted, and most of the machinery has been installed. This building is a credit to Bentley, and to Central Alberta.

The new Red and White store is nearly completed. The outside work will be done this week. It should be open for business within the next few weeks.

The new tennis courts are in operation, and many people will take advantage of them this ideal weather.

Miss Alice Blaikie of the Bank of Montreal staff left for her holidays last Saturday.

The boulevards in Bentley are looking splendid, and are being kept in wonderful shape by the citizens.

EXPLANATION OF PRESENT CRISIS

The world monetary crisis formed the theme of the Rhodes lecturers by the well-known economist, Professor Gustav Cassell. He held that the present crisis is in its nature unlike earlier crises and cannot be explained as a particular phase of a cyclical movement in business assumed to be inherent in the capitalist organization of the world's economy. He argued it is an entirely new phenomenon.

Dealing with the popular assumption that the continual lowering of cost of production following on technical progress, must bring down the general level of prices, he claimed that reduction in production cost could never mean anything else than that a shortening of the distance between the prices of labor, raw materials and other production factors on one side, and the prices of finished goods on the other. But such a shortening had nothing to do with the general level of prices. The price index of 1850 he pointed out, was practically the same as 1910, although in that period the technical progress achieved was enormous. From 1895 up to the war, the general level of commodity prices actually rose in spite of unusually rapid technical achievefent and increased output. If production increases, the means of payment ought naturally to increase in the same ratio, and therefore prices should maintain an even keel.

Concerning the claim that the war offers the main explanation of the present crisis, Professor Cassel said this was pure superstition. A real economic connection could hardly be established between a war, supposed to have destroyed wealth to an enormous extent, and a crisis, supposed to be characterized essentially by overproduction of wealth. What has caused the crisis, in his opinion, is a series of post-war mistakes and violations of fundamental economic principles. Having finished the war, "the world has proceeded to claim war debts and reparation without being willing to accept payment, to cut up the world's market by aid of the most extraordinary protectionist devices into almost watertight compartments, to prohibit the international migration of men, to hinder the free movement of capital, and to prevent by aid of great valorization schemes a natural adjustment of the prices of certain commodities. Within our different countries we had developed monopolies both of enterprise and labor, and in this way had done all we could to restrict internal freedom of movement. Not content with that, we had created systems of unemployment doles calculated to increase the immobility of labor in a very dangerous way, and, in addition, to ruin public finances. Some people had started so-called radical movements aiming at the revolution of our whole economic system, but the only thing they had attained thereby, and conceivably ever could attain, had been to destroy confidence, and the spirit of entertprise on which our whole economic life is founded."

A Message From The Prince

In January of this year, the Prince of Wales addressed a message to the youth of Great Britain at a large meeting held in the Royal Albert Hall, London, England. That message is just as applicable to the youth of Canada as it is to the youth of the Old Land, and we, therefore, reproduce the speech, in part, as follows:

Youth cannot long remain a spectator of life, it will only be a short time before the work of the world will be placed on your shoulders to carry. Many tasks wait for your help; knowledge to be discovered, open spaces to be peopled, natural resources to be developed, sickness to be conquered, and wrongs to be righted. With these high quests bfore you, you will realize that the mere acquisition of material things is not in itself the fulfilment of an individual or a national purpose, and as is little, compared with the satisfaction derived from your own effort, especially when that effort advances human welfare and happiness.

I want you to understand that we are not just facing a few months of "grin and bear it," but that we must get into training for a long period of work—hard work and effort, sustained despite possible discouragements. You must be prepared, as others have been before, to enlist "for the duration," without asking how much may in the long run be required of you.

You cannot hope to influence directly the trend of international affairs, but close at hand is a domestic problem, vast and baffling if looked at in the mass, though easier to help when broken up into individual pieces. It is made up of men and women, boys and girls. I am, as you will have guessed, thinking of unemployment. I am thinking now neither in terms of economics nor of politics but of each member of the unemployed population as a single, separate personality, beset by depression, labouring under a sense of frustration and futility—a blank wall in front of him which he can neither climb over nor scramble round. My appeal here is not to statesmen, nor even to philanthropists, but to all those who are in work to play the part of neighbour and friend to the man out of work. That is the open road of duty and a short cut to happiness all round. There is no central machinery here in London that can provide a substitute for the good neighbour.

The enemy today is depression and apathy. Let us attack them with two of our old-fashioned characteristics—good sense and good humour. I believe there are groups of the unemployed here and there, dead sick of prolonged idleness, who are themselves feeling out toward ways of giving their unhired labour in co-operative effort for the help of others in need. It is up to us to back such attempts with every possible support. Get together wherever this burden lies heaviest, face up to the most urgent local need, and see if the community on the spot cannot make its own self-directed contribution toward this vast problem. So far as is humanly possible let us break it up into little pieces and refuse to be browbeaten into paralysis by its size. I am talking, I repeat, neither on the economic nor on the political plane, but on the humane plane of simple friendship in those places where the clouds are darkest, where the pits are closed or the furnaces damped down. What matter if some trifling blunder is committed here or some project fails there. The very attempt of the community to achieve some social betterment for the sake of the workless in their midst will lift the general level of hope and make easier every national solution by statesmen and economist.

The world passed into a new age with the end of the Great War. Never was a new age born in greater agony, nor in a more difficult environment for healthy and normal growth. What we make of it as a democracy is of vital concern not only to ourselves but to the whole world.

The message that I have tried to give you is a twofold one:—First, for a fresh response to national service, for a greater spirit of unselfish and adventurous helpfulness in the midst of problems which our ablest men find difficult to unravel.

The second point is that the opportunity for service is at our door—in our own village, in our own town.

On Training the Child

Parents Inclined To Pass the Responsibility To Other Shoulders

The bad and blundering side of State benevolence is nowhere plainer than in the relations between parent and child. On the whole, as the State takes more responsibility for the child, the parent takes less. Parents are encouraged to abdicate in favour of the doctor, the teacher, the policeman—all the agencies which the State offers or forces upon them without apparent cost. Children tend to get less from their parents in the way of example, attention and steadying influence. In these things, when the parent fails, there is no real substitute. The "old-fashioned" parent made it his and her first business to bring up the children—and found time for the business, though families were large and methods summary. The new-style parent has been induced to profess as a general creed that "the State will provide." It is the children who suffer.—London Times.

Should Have Been Careful

"What's happened, George?" she asked her husband who had got out of the car to investigate.

"Puncture," he said briefly.

"You ought to have been on the lookout for this," was the helpful remark. "You remember the guide warned you there was a fork in the road."

Britain proposes to print its postage stamps in a government plant, the work now being done by private firms under contract.

The production of silk cocoons in Japan is largely a household industry, furnishing partial employment to more than 2,000,000 families.

A form of gas mask has been invented to protect firemen in dense smoke or under 16 feet of water.

Canadian Bacon For Britain

Mother Country Buys More Bacon From Canada Than From U.S.

Great Britain is at present buying more bacon from Canada than from the United States. A report issued by the Dominion Bureau of Statistics shows that imports of bacon into Great Britain from Canada, not including hams, in the first four months of this year totalled 5,727,500 pounds. In 1930 the imports were 3,713,700 pounds, but they dropped to 469,500 pounds in the same period of 1931.

In the first four months of 1930, British imports from the United States amounted to 25,811,000 pounds. This dropped in the same period of 1931 to 8,925,900 pounds, and in 1932 to 2,569,700.

Flies Across Australia

Young Girl Makes Hazardous Journey Through Desert

Irene Dean-Williams, "flapper flyer," arrived at Melbourne from Perth, western Australia, thus becoming the first woman to pilot an aeroplane across the Australian continent.

Part of the flight was across the central Australian desert, the "graveyard" of many flyers, where the air often is so hot and devoid of moisture, that it blisters the mouth and nostrils.

A safe and sure medicine for a child troubled with worms is Mother Graves' Worm Exterminator.

Thirteen women and 14 men have just completed 40 years' service, a total of 1,080 years, with an England confectionery concern, which presented them long-service awards.

Hail is a hot-weather phenomenon, says the weather bureau; true hail rarely falls in winter.

Animal diseases cost farmers of England $100,000,000 last year.

MILBURN'S HEART AND NERVE PILLS

Price 50c a box

Nerves A Complete Wreck Sat Up Half The Night

Mrs. John Rose, Bark Lake, Ont., writes:—"I was troubled so much with my nerves I was a complete wreck.

I could not do my work, and would have to sit up half the night on account of not being able to sleep.

One day a friend recommended Milburn's Heart and Nerve Pills. I used one box and got relief, and by the time I had taken six boxes I was as well as ever."

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Kindness To Animals

London Urchin Did Not Seek Any Reward For Act Of Mercy

Sir Robert Gower, M.P., chairman of the Royal Society for the Prevention of Cruelty to Animals in Great Britain, told the following story at a meeting of the Society:

"Some time ago I was walking down Bond Street West, and saw a poor, miserable cat in the road which looked as if it would be run over. A ragamuffin dashed into the road, caught the cat at the risk of his own life, and placed it on the pavement.

"I went to him and said, 'I am chairman of the R.S.P.C.A., and would like your name.'

"'Garn,' replied the boy. From his attitude it appeared that he did not believe me, and I said, 'I am what I say I am and would like your name and address to recommend you for a medal. Wouldn't you like a medal?'

"The little ragamuffin turned and said, 'A gentleman told us we had got to be kind to animals and not expect any reward.' The lad then turned on his heels and bolted."

That anecdote is an editorial in itself and little comment is needed.

Lamartine, the French poet, said: "Brutality to an animal is cruelty to mankind. The only difference is in the victim."

What steps, if any, are taken to teach that principle to Canadian children? Do the school teachers do it? They have a wonderful opportunity to inculcate the feeling of kindness toward animals in the rising generations.—St. Thomas Times-Journal.

Saskatchewan Fire Loss

Statistics For Year 1931 Released By Minister Of Public Works

Saskatchewan's fire loss in 1931 was $3,564,300, as compared with $3,405,293 in 1930, according to figures released by Hon. J. F. Bryant, Minister of Public Works.

Fires numbered 3,888 in 1931, and 2,558 in 1930. Last year the per capita loss was $3.87 and fires averaged 11 each day of the year.

Of all the fires in 1931, the cause remained undetermined in 50 per cent. of the cases. Incendiary origin was suspected in seven per cent. of the cases.

The principal losses were as follows: 1,538 dwellings, 587 stores, 482 barns, 52 granaries, 48 garages, 46 apartments, 40 cafes, 30 schools, 26 pool rooms, 48 hotels, 18 theatres, 25 elevators, 15 churches, 10 banks and 7 warehouses.

Care For Destitute

No One In Ontario Will Be Allowed To Starve, Says Premier Henry

No matter what happens, no person in Ontario shall be allowed to starve, and to that end the Ontario government is planning the organization of a competent committee of outstanding men to set up a standard of assistance which shall be given to those in distress. This committee will be chosen from outside the government and will be representative of the most advanced thought in the municipalities of the province, declared Hon. George S. Henry, Prime Minister of Ontario, to 1,500 persons gathered in London, Ont., for the ninth annual convention of the Western Ontario Conservative Association.

Good-bye Asthma. Persons suffering from that extremely trying trouble known as asthma know what it is to long with all their hearts for escape as from a tyrant. Never do they know when an attack may come and they know that the struggle unaided is vain. With Dr. J. D. Kellogg's Asthma Remedy at hand, however, they can say good-bye to their enemy and enjoy life again. It helps at once.

Perfect Production Of "Tone Values" Sought

British Firms Spending Huge Sum On Sound Test

The "big three" of Britain's radio-gramophone firms have decided to spend $100,000—just to satisfy the critical ear of a musician.

The money is to be devoted to research for achieving perfect reproduction of all "tone values." The average listener cannot even detect that these are lacking, but the highly trained musician can.

Acoustic experts are now engaged in solving this problem. When they have done so Great Britain will be able to claim that it produces the most perfect sound reproducers in the world.

Maybe Keys Were Needed

A tourist party of ladies were obliged to seek quarters in a farm house, where everything was simplicity itself, and also scrupulously clean and homelike. When bedtime came some of the party, finding there were no keys in the locks of their rooms, consulted the farmer's wife, who was undisguisedly surprised. "Why," she said, "we don't usually lock our doors here, and there's no one here but you! But then," she added, scrutinizing the ladies carefully, "I suppose you know your own party best!"

Sixty tons of flowers are being shipped daily from Spalding, England, and soon 200 tons will be sent each day to all parts of the country.

Soviet dumping has seriously affected Latvia's lumber exports.

"I Was Terribly Run Down"

Says Mrs. Doughty: "Dr. Williams' Pink Pills Built Me Up"

Wrought Marvellous Change

"I believe it my duty to tell others what wonderful results I obtained from Dr. Williams' Pink Pills," writes Mrs. James Doughty, Brantford, Ont. "I was in a terribly nervous and run-down condition; very pale and with no ambition. I took three boxes of the Pills, and I soon began to feel like a new woman. No trouble to do my housework. The Pills built me up and put me in first-class condition."

Mrs. Richard Rush, Roblin, Man., writes: "Diphtheria left our daughter, Beth, a nervous wreck. She was unable to continue at school. I gave her Dr. Williams' Pink Pills, and the change in her was marvellous. She is enjoying splendid health — and we do feel that Dr. Williams' Pink Pills saved her life."

Don't allow yourself or your daughter to be robbed of health and vigour. Use Dr. Williams' Pink Pills. They are no temporary relief. They banish run-down or nervous conditions by creating new blood, which imparts health, vigour and vitality. 50c—at your druggist's.

Will Use Bay Route

Famous French Grain Firm Will Make Big Shipment Of Wheat

Dreyfus, famous French grain firm, has purchased a quarter of a million bushels of wheat in western Canada, that will be shipped this season over the Hudson Bay route to France, it was definitely learned from official sources. Through a New York agency the French firm has completed the purchase of the grain and gave the first sign of completion between important grain firms over the use of the new Bay route in shipping grain to European ports. Already nearly two million bushels have been shipped to Churchill for the Continental Grain Company. This group will export at least one million bushels this summer.

L. B. Cusick, Canadian president of the Continental Grain Company, is making a strong effort to obtain cargoes for the four or five boats his company will bring into Churchill this summer for the shipment of their grain.

"If a reasonable amount of incoming cargo can be obtained and the insurance rates lowered slightly, the Hudson Bay route is a cinch," he declared in an interview.

"We firmly believe the insurance rates will be cut this summer, and we expect the people of western Canada to support their new seaport to the extent of obtaining incoming cargoes," he said.

Canadian Tobacco Exports

Dominion Largest Exporter In Empire Of Tobacco To Great Britain

Canada in the first four months of 1932 has definitely established herself as the largest exporter among countries of the Empire of unmanufactured tobacco to Great Britain.

From January to April, a report of the Dominion Bureau of Statistics shows, Canada exported 6,863,315 pounds of tobacco compared with 2,809,766 pounds for the same period of 1930. The total imports into Great Britain aggregated 48,236,021 pounds for the four months, with British Empire countries supplying 10,075,083 pounds.

Fly Around the World

Aviator Contemplates Globe Circling Tour With His Wife

Lieutenant Frank J. Lynch of Summit, N.J., who describes himself as a former war-time flying instructor at San Diego, and a former movie stunt pilot, has announced details of a 40,000-mile round-the-world flight in a monoplane now nearing completion. Lynch said he will make the tour with his wife, the former Josephine McKee of St. Paul, Minn.

Their 'plane is a high wing monoplane and will have a cruising speed of 175 miles an hour, and a top of 210.

Miller's Worm Powders are complete in themselves. They not only drive worms from the system, but repair the damage that worms cause and so invigorate the constitution that it speedily recovers from the disorders of the digestion that are the result of the work of these parasitic intruders. They do their work thoroughly and strength and soundness follow their use.

Licenses For Street Singers

Paris is demanding that street singers be placed under control, for they are becoming too numerous and too noisy. It is proposed to have them licensed, and to permit them to sing only at certain hours and only in districts specified by the police.

Both ends of a telephone conversation can be recorded with a new machine for future reference.

CARTER'S LITTLE LIVER PILLS

W. N. U. 1845

"The New Universe"

Scientists Are Making Discoveries Hard For Mind To Grasp

Science in these days is making marvellous discoveries in the region of the infinitesimally great and the infinitesimally small. To the ordinary mind the results are inconceivable and impossible to grasp. The man or woman who takes a walk on a fine starry night only thinks of "how bright the stars are tonight" not imagining that beams that are falling on the eye started from their source before Christ was born, even though they are travelling at the rate of 186,000 miles per second. Nor does a man, when he raises his hand to "smooth the furrowed brow," imagine the commotion he has set up on the switchboard of the nervous system and the phone messages that are flying from brain to muscle along microscopically thin wires of nerve cells.

Perhaps it is in the realm of astronomy and the discoveries of astronomers with the aid of the apparata of telescope, spectroscope and camera, that the greatest tests are given to the human mind. Speaking recently at the University of Manchester, on the subject of "The New Universe," Sir James Jeans discussed the problem of rotating nebulae, which, by many, are believed to be new worlds in the process of formation. The faintest nebulae, he said, which could be observed photographically in the 100-inch telescope on Mount Wilson, were at a distance of 140,000,000 light years. Whether or not this will be made any clearer by bringing it to terms of miles, it may be said this distance is approximately 8,400,000,000,000,000,000,000 miles and within this distance lay some 2,000,000 nebulae.

Yet another telescope is in the making which will give a magnification of eight times greater than that of the largest used today. That will bring millions more worlds within human and photographic vision, enlarging our knowledge of the universe, and still leaving much more to the imagination.

In the midst of all this immensity the world is jogging on at the almost snail's pace of 18 miles a second, when compared with the velocity of other worlds. But the infinitesimal cells of man's grey matter are piercing to vastnesses of the heavens and wresting nature's secrets from her. Truly the Great Architect works to a scale unrealizable by man's finite mind though much is being revealed. —Regina Daily Star.

Good News For Travellers

Many Improvements Make New Upper Berths Very Comfortable

Travellers will be pleased to learn that the Pullman Company has been experimenting with various devices to add to the comfort of the upstairs passengers in its sleeping cars. The old difficulties of climbing to a second-storey berth and disrobing in a space with limited headroom have been eliminated.

The Pullman News reports that a passenger now ascends easily by means of a stairway which conveniently and automatically folds up when he has reached his berth. He steps upon a "dressing platform," 18¾ inches by 13¾ inches. It is a sort of well, produced by folding back the mattress end. The distance from platform to car roof is 6 feet 1½ inches, so there is ample space for standing erect, and the collapsed mattress may offer a comfortable seat. When the traveller is ready for bed he drops the hinged part of the berth front and pushes the mattress back into position.

Experimental use of the new berths on the Michigan Central Railroad between Chicago and Detroit is said to have demonstrated that passengers approve of them.

The improved upper berths also have dormer windows. These will be welcomed by fresh-air enthusiasts and by nervous travellers who like to see what's going on outside, even at night.—New York Times.

Italian Air Fleet Coming

Twenty Sea 'Planes Plan Trip To Chicago Next Year

A second Italian air fleet will fly the Atlantic next year, with the double purpose of celebrating the tenth year of Fascism and also the World's Fair in Chicago.

A fleet of 20 twin-motored seaplanes, under command of General Italo Balbo, the Air Minister, the same man who commanded the first armada to South America a year ago, will undertake the flight. The ultimate objective will be Chicago.

The route probably will be via Ireland, Iceland, Greenland, Labrador and Canadian points.

Claims New World Mark

The San Antonio River, holder of all records for the most bridges in the least mileage, now claims a new world mark. The Martinez Street crossing, recently constructed, is declared by Consulting Engineer J. K. Beretta to be the longest reinforced concrete, strictly rigid frame bridge in the world. Its span is 101½ feet, yet the bridge is only 38 inches thick.

"Papa," she asked, "ain't you a little 'fraid of bugs?" "No, dear." "Ain't you 'fraid of snakes and frogs, daddy?" "No, dear." A pause and the little miss asked: "Papa, ain't you 'fraid of nothing else in the whole world 'cept just mamma?"

Contract Bridge

By Hamlin B Hatch, Cavendish Club, Toronto

Systems In Contract

The average contract bridge player, at the present time is agog over the controversy raging around the different systems of playing. There are four principal systems now being exploited by their different sponsors. In order of importance they rank as follows:—

1st. The Approach-Forcing System (Sponsored by Culbertson).

2nd. The Official System (Sponsored by Lenz et Al).

3rd. The One Over One (Sponsored by Geo. Reith and The Knickerbocker Whist Club).

4th. The Vanderbilt Club (Sponsored by Harold Vanderbilt).

A system in Contract may be defined as an attempt to put into a form easy to learn, the methods the good card player have always used. This being so, it is certain that, as most card players use the same methods with slight variations, any system can differ from any other system only slightly. And this is so. The variation in all four systems are slight and the good contract player is, as a rule, familiar with all the systems, and can, if asked to do so, play any system his partner desires to play.

The Approach-Forcing System

The salient points of the Approach-Forcing System are as follows:—

1st. The opening bid of one which must have a minimum of 2½ honor tricks and four playing tricks, and may have a maximum of six honor tricks and seven or eight playing tricks.

2nd. The weak no trump takeout by the partner of the original bidder. This is made on a maximum of one and one-half honor tricks and a minimum of one honor trick, or in exceptional cases of less than one honor trick. The takeout denies normal support in suit originally bid and practically warns partner that for that particular deal, the partnership must be satisfied with partial score. Further it discloses the fact that, as a rule, the responding hand is balanced i.e., contains no void suit or singleton.

3rd. The Jump-Shift Response. This is a jump bid in a suit other than the suit originally bid and is a demand bid requiring the partnership to keep the bidding open until a game contract is arrived at. It is made by the responding hand usually on a minimum of two and one-half honor tricks, or sometimes less when the hand distribution is favorable.

4th. The Original Two Bid. Based on five and one-half honor tricks as a minimum and demands that bidding be kept open by partnership until game contract is arrived at. The tendency lately, by users of this system is to limit the two bid to hands which will make game with even less than one honor trick in partner's hand.

5th. The Jump Overcall. A jump bid made by opponents of original bidder and is a strong invitation to partner of the overcaller to keep the bidding open provided partner has the equivalent of one honor trick. If however the overcaller's partner has less than one honor trick he may pass.

6th. The Informative Double. A bid made as an overcall and demands a response from partner of doubler provided there is no intervening bid. It is usually made with strength in the major suits and is a fighting not a defensive bid. With the balance of strength in the hand of the doubler's partner, game is likely in the hand.

7th. The Overcall by the opponents of the suit bid originally by two of the same suit. If the opening bid is one heart and the opponents overcall with two hearts, such an overcall means control of the heart suit i.e. either a void in hearts, the singleton ace, the ace small, or the ace king or ace queen. This bid is the most powerful bid in the approach forcing system, is used definitely as a slam signal and practically guarantees game in any four card suit that the partner of the overcaller has.

The synopsis given above contains practically all the salient features of the Approach-Forcing System. Generally it may be said that in this system whenever there is a four card biddable suit in the hand, this suit is bid in preference to no trump. A biddable four card suit may be defined as one which contains two high honors, one of which must be the ace or king, and the other queen or jack. The no trump opening bid is made only when the hand contains two and one-half honor tricks, no four or five card biddable suit, and has a balanced pattern.

In the next article the main features of the other systems will be outlined.

Possibility Of Oil In Northern Alberta

Geologists Believe Ancient Rock Formations Are An Indication

Rock formations in the northern section of Alberta indicate possibilities of oil in commercial quantities. This opinion was expressed at Ottawa before the Royal Society of Canada when a number of geologists described the districts of Mountain Park, Peace River, Wainwright and Viking as containing marine sediments. This would indicate, they said, the district once formed a part of the vast ocean that covered what now forms the three prairie provinces. The rocky formations are about 150,000,000 years old.

Britain's Concrete Highways

During 1931 there were 440 miles of all-concrete roadway laid in the British Isles—140 miles more than in any previous year. Roads are now constructed in buff, red and green concrete as being more sightly, and offering a striking contrast to kerbs and direction signals.

Sky Cinema Tested

A "Sky Cinema" invented by a German engineer, Dr. Mannheimer, has been successfully tested over Berlin. It projects moving pictures on the clouds.

The man who becomes a critic by trade ceases in reality to be one at all.

DEFINITE HELP FOR DWELLERS IN APARTMENTS

Odorless way found to cook fish, cauliflower and cabbage

CANAPAR IS A PRODUCT OF HAMILTON FIRM

Lives there a woman, in apartment, duplex or home, who has not at some time or other reluctantly foregone fish, cabbage, and cauliflower because of the odors they give off when being cooked? Or who has not suffered from other people close by who cooked these foods regardless?

Canapar entirely does away with this annoyance. More than that, it actually improves flavor and food value! Cooking in Canapar parallels the famous French method of simmering and confining food and its flavours to the closed casserole.

Canapar comes in large sheets, in a handy-size package. When boiling vegetables you simply wet a sheet of Canapar and make a bag similar to a pudding bag. If you are steaming them you line your steamer with Canapar, arrange food and seasoning, and fold back corners of the Canapar to prevent steam from dripping back.

Boiled or steamed fish is particularly delicious done this way. No fishy odor in the kitchen, no gummy kettle to clean. When roasting meat, line the pan with Canapar. It prevents the fats and juices from burning, and eliminates scouring of the pan afterwards.

Canapar saves fuel. You can cook three vegetables simultaneously in the same saucepan with it, without intermingling of flavors. And it is very economical. Just rinse the sheet after using it, hang it on the towel rack to dry. Use it over and over again.

Lots of women use Canapar for a dish cloth—it is so silky and satisfactory and does not spread lint. This is a particularly good use if you happen to pierce the sheet of Canapar while testing the food during the cooking of it. Canapar is made by the makers of PARA-SANI the famous heavy waxed paper in the Green box.

Special Offer

Most grocers, druggiars and department stores sell Canapar. If yours doesn't, send the coupon direct and we'll give you a new and unique book entitled "Leftovers" containing one hundred recipes as a bonus for your trouble.

Appleford Paper Products, Ltd., Hamilton, Ontario.

Enclosed find 25c for which please send me one full-size package of CANAPAR Cookery Parchment and your 100 recipes for "Left-overs."

Trains On Rubber Tires

Forerunner Of a New Era In Rail Comfort

The pneumatic-tired railroad coach which made a trial trip from Cleveland to Akron and return this week may easily prove a forerunner of a new era in rail comfort. Trunk lines are speeding up their schedules. Palace car builders are getting away from stereotyped interiors. The pounding of steel wheels on steel rails may ultimately be outlawed as needless.

Railroads in general have been slow to copy devices which give their competitors advantages in the race for business. Be the reasons what they may—and some of them, are obvious enough—rail lines have suffered by the motor industry's avid adoption and improvement of such things as rubber tires, lighter engines, less rigid schedules, better coach construction and other factors. A liberal public attitude toward the use of highways is part of the story.

Tires of rubber, and particularly air-inflated tires, have played a large part in a transportation evolution. If railroads can make use of them, as recent experimentation indicates they hope to, some check may be put on the trek of passengers from rail to highways.—Cleveland Plain Dealer.

A Great Dairy Country

Denmark has per 100 inhabitants about 86 head of cattle, of which 45 are dairy cows. Since the beginning of the century the average yearly yield of milk in that country has increased from 6,493 to 8,217 pounds, the percentage of fat from 3.49 to 3.86, and the pounds of butter fat from 220 to 317.2.

Persian Balm is a sheer delight to use. Cools and relieves irritations caused by weather conditions. Imparts a rare charm and beauty to the complexion. Fragrant and velvety smooth. Never leaves a vestige of stickiness. Swiftly absorbed by the tissues and stimulates the skin. Persian Balm is the peerless toilet requisite. Every woman will appreciate the subtly distinctive charm achieved by the use of this magical lotion.

World consumption of hides last year is estimated to have been the smallest for six years, having approximated 65,120,00.

Vinegar probably dates back to the first batch of soured wine.

DR. HAMILTON'S PILLS

FOR HEADACHE INDIGESTION BILIOUSNESS CONSTIPATION

Scientists At Ottawa Suggest That There Be Two Major Divisions Of Geological Time

Standard time consisting of eons, eras, suberas and periods is the aim of the national committee on stratigraphical nomenclature, Dr. F. J. Alcock, of the geological survey of Canada, chairman, told Section 4 of the Royal Society of Canada meeting at Ottawa.

It is the opinion of the committee that geological time previous to the development of abundant life on the earth's surface is at least as great as geological time from that development until the present moment. The suggestion is that, therefore, there should be two major divisions, and that these be known as "eons."

Seven hundred million years was the estimate of some members of the section of the length of the latter eon, and they thought the former to be much longer. Granite rocks in Manitoba, have been stated to have an age of 2,000,000,000 years.

At the same session a paper by Prof. J. S. Delury, of the University of Manitoba, speculated on the earth's development and composition. The belief expressed was that the centre of the earth consists of heavy, dense metallic substances; that its crust consisted of lighter rocks and that in between lies the great zone of flowage and adjustments. The earth, Prof. Delury stated, is losing heat in exceptionally large amounts from certain more or less restricted belts of the earth's surface. Once, millions of years ago, the escape of heat in this way occurred in Canada; now it is chiefly in the vicinity of the Hawaiian Islands in the Pacific Ocean. Supporting his thesis, Prof. Delury reported that the temperature rises one degree every 400 feet down in the Frood mine of Northern Ontario. In Hawaii the temperature rises one degree in every 50 feet.

How aerial photography has achieved results for geologists which on foot they would have been years in securing was shown by D. A. Nichols of the geological survey, who exhibited an unusual series of photographs taken by the Royal Canadian Air Force. In these pictures, taken chiefly in the Athabasca, Great Bear and Great Slave Lake and Arctic areas of Canada, land forms such as faults, dykes, folds, fjords, eskers and beaches (formed years ago) were clearly defined and some were shown to extend for many miles. Some of these were recognized from descriptions given by members of the geological survey as many as 40 years ago.

Further light, of value to miners and prospectors, of British Columbia, was thrown on the body of granite rocks known as the Coast Batholith, which extends 1,200 miles from a point near the international boundary northward and westward into Alaska. The survey work of the geological survey, which began in this area as far back as 1851, has provided additional information year by year. Once it was thought the possibilities of finding valuable deposits were as good in one part of the area as another. The geological survey is indicating where the prospects are good and where they are not. Detailed studies, for instance, have shown that mineral deposits occur associated with certain types of rock and the mapping of these areas provides valuable guides.

Authors of papers given were Dr. Forrest Kerr, of the geological survey; Dr. S. J. Schofield, of the University of British Columbia, and Dr. H. C. Gunning, also of the geological survey.

Society Learns How Insulin Is Produced

Paper Read At Ottawa Meeting By Dr. Banting's Associate

Present methods of producing insulin, Canadian discovered diabetes remedy, in large quantities were described to the Royal Society of Canada in a paper by D. A. Scott and H. Parker, read by Dr. C. H. Best, Toronto associate of Dr. F. G. Banting.

Newest laboratory practice resulting from long research enables production of 2,000 units of insulin from one 8logram of pancreas, a gland-secreting digestive fluid, the paper said.

Quebec's maple sugar crop for 1932, which is roughly estimated at 24,000,000 pounds, is double that of last year, though 6,000,000 pounds under average.

Octopi cannot walk or live out of water longer than about three hours.

"Did that suit really cost £6?"

"Yes, I can show you 15 demands for payment."—Kasper, Stockholm.

W. N. U. 1845

Lessons By Radio

Use Of Broadcasting To Further Education In the West

The use of radio broadcasting to extend the benefits of university training was urged upon the 15th national conference of Canadian universities at Ottawa by Professor E. A. Corbett, director of extra-mural relations at the University of Alberta, and conductor of the university's radio station, CKUA. This university has been a pioneer in the use of the radio for educational purposes in Canada and has developed a considerable volume of educational broadcasting which covers practically the whole province.

Professor Corbett recently appeared before the parliamentary committee on radio broadcasting with a brief prepared in the interest of educational broadcasting and had made a study of this work in those sections of the United States in which this work has been carried on to a considerable extent.

Some of the work of Canadian universities, aimed at making Canada a truly bilingual country, was described.

The subject of the first session was "Modern Language Teaching," and dealt almost entirely with the teaching of French in English universities, and the teaching of English in French speaking universities.

Abbe Alexander Vachon, Laval University, observed that practically every Quebec member of the House of Commons could express himself adequately in the English language, and that many could speak with equal facility in either language. At Laval an attempt was made to give every graduate a complete mastery of the English language, even though he might enter the college with no English.

For International Conference

Every Country Alarmed At Economic Condition Of the World

British newspapers publish an appeal signed by 120 men and women, chiefly of Manchester, including leaders of the churches, business men and economists, for an international conference to consider the state of the world. The text of the manifesto, which is entitled "The Interdependence of Nations," is as follows:

It is no secret that thoughtful men in every country are alarmed at the economic condition of the world. With no lack of natural products or manufactured goods everywhere, the whole world is threatened with bankruptcy. No one would deny that the circulation of goods is the life-blood of national and international commerce. We therefore affirm that the only way to renewed prosperity is the removal of all hindrances to the free flow of goods and commodities and to the unhampered intercourse between nations. This in our opinion, involves:

(a) The cancellation of War indemnities and reparations.

(b) The lightening of the crushing burden of taxation due to excessive armaments.

(c) The lowering or removal of tariff barriers.

Inasmuch as the wheels of industry are obviously slowing down, and a total stop of the entire machinery of commerce, with the result of incalculable material and moral disaster to millions, is something more than possible in the near future, we urge that these matters be brought immediately before an International Conference.

We make this appeal on moral and economic grounds, convinced that until the nations realize their essential unity, no solution of our present problem is possible.

Indian Athlete

Native At Fort Chipewyan Makes High Jump Record

Canadian Olympic committee officials seeking point winners for the Los Angeles games might well turn to latent material among Indian tribes in the Northwest Territories if an athletic record in the Royal Canadian Mounted Police annual report is accurate.

According to Inspector H. Royal-Gagnon, a young Indian whom he does not name jumped six feet one inch at a field meet held at Fort Chipewyan. Knowing nothing of the high jumping art, the Indian, the inspector relates, "just jumps over."

A Huge Oak Tree

An unusual oak tree, containing two chapels within its huge trunk, will celebrate its 1,200th year of existence on July 2 at the village of Allouville-Beiefosse, near Rouen, France.

More than $5,135,000 has been awarded since the inauguration of the Nobel Prizes, which are given to leading men and women for services to literature, science, and international peace.

Customer: "I want to look at a few swords."

Military Outfitter: "Yes, sir. Cavalry or Infantry?"

"Oh, I don't suppose it really matters. It's for wedding-cake."

The Survival Of Music

Success Of Festivals Proves "Canned" Variety Not So Popular

It is often predicted that the amateur singer or performer on a musical instrument is doomed to extinction because this is the age of "canned music," and only those professionals who are good enough to get a job in opera, on the stage, in the pictures or before the microphone, will survive. It is true that what is called "canned music" is accepted generally and with faint protest. It has dethroned orchestras in the theatres and having thus abolished many jobs from which ambitious musicians were drawing sustenance, has wiped out a lot of incentive to musical efficiency.

Despite these discouragements in the sphere where musicians might gather some financial support, there seems to be a fair representation of the youth of the country that is still devoting time to voice culture and to a diversity of instruments. This is true of the rural districts as well as of the larger centres.

Music still makes its own appeal to the artistically inclined. The field of endeavor is so attractive that individuals are likely to try to be singers or players whether or not they may market their accomplishments with any measure of profit.

In any event the musical festivals are providing an outlet for the enthusiasm of those who desire to excel in an art that seems to be native to the whole human race. As music has survived many historic upheavals that have rocked the world in other directions, it may be assumed that the detrimental influences noted today are not likely to be any more successful in uprooting the passion for music than were similar movements in the past.

Living Conditions In Ireland Have Improved

Change For Better Since Free State Came Into Being

An article by Charles Petrie, in Nineteenth Century and After, says: the general standard of living is decidedly lower in Ireland than in England, and both wireless sets and gramophones are still regarded in the light of luxuries rather than as necessities. On the other hand, the farmer's wife and daughters are not trying so hard to be ladies that they have no time to take their share in the work of the farm. Moreover, there has been a great change for the better since the Free States came into being, even where the poorest class of the population is concerned. The crumbling cottages of generations ago have either been repaired or replaced by more modern dwellings, and in their new surroundings the inhabitants have acquired a new self respect. Beggars are as rare in the Free State as in Fascist Italy, and the Londoner who visits Dublin will find it a decided relief not to be pestered for money every few yards along the street. Only in the more remote parts of Galway is the down-at-heels peasant of yore still to be seen, for elsewhere he has been replaced by the type of countrymen of whom any country might well be proud. Inebriety, too, is on the decline, possibly for economic reasons.

An Ironic Fact

It is a somewhat ironic fact that the little village of Bond Head in Eastern Ontario, should be the birthplace of two of the most distinguished Canadians of the generation following the pioneer days, one of whom Sir William Osler, was famous for the contention that men were useless above 60 years of age, while the other Sir William Mulock, has had nearly 30 years of the highest form of usefulness after passing that age and at nearly 90 is still going strong.

A freshman at Indiana University, taking out a permit to use his car while in residence, found himself confronted with the following question:

"Purpose for which car is to be used?" In the blank he wrote:

"To ride in."

Fashion

433

A FASCINATING MODEL—DOES FOR SHEER COTTONS AS WELL AS THOSE OF STURDIER CHARACTER

Nautical blue and white print in batiste, because it is so popular, is chosen by this smart junior.

And don't you think it is effective? The yoked bodice and inset at the front to simulate a bolero are of plain batiste. It tones with the blue shade.

Other schemes such as yellow and white in pique, striped cotton weave in red, white and blue with plain white and plain pink sportsweight linen with white handkerchief linen dotted in pink used for contrast are adorable.

Style No. 433 is designed for sizes 6, 8, 10 and 12 years. Size 8 requires 1¾ yards of 35-inch material with ½ yard of 35-inch contrasting and 2 yards of binding.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Figured He Was Wrestler

Paderewski's Name Meant Nothing To Spokane Express Agent

From the far other shore of this broad land, from Spokane, Washington, to be specific, is relayed one end of a telephone conversation overheard by a traveller. It was the express agent at the railroad station there calling the Auditorium Theatre. He got his connection and asked for the man who handled the wrestling matches.

"Hello," he said, "is this the man that handles the wrestling? Well, we got a big crate here and we didn't know what theatre to send it to. We figure it's yours. You got a wrestler coming by the name of Paderewski?"

Some Counter

"My husband is a real prize to the bank," said the boastful wife of a bank clerk. "The way in which he handles notes is truly wonderful — counts them like lightning, without ever making a mistake." "Really," said the friend to whom the statement was made. "Never a mistake at all?" "No—well, at least he is never out more than a few coppers!"

Universe Is Expanding At Terrific Speed

New Theory Advanced By Eminent Astronomer At Manchester

A new theory of the expansion of the universe was advanced by Sir James Jeans, eminent physicist and astronomer, in a lecture at Manchester University.

Citing discoveries indicating that the universe is expanding at terrific speed, Sir James suggested that this expansion originally was caused by the condensation of chaotic gases into nebulae countless ages ago.

He pictured the universe — the curved universe relativity suggests— as a stick balanced on its point and steadily falling over at an increasing speed. But he added that an eternity of time would be required to produce an infinitesimal amount of wobble.

"It has been shown," Sir James said, "that the condensation of chaotic gas into nebulae can provide in some roundabout way the initial impulse which pulls the trigger and hands the universe over to the effects of its instability. The trembling universe must have been balanced with an almost unthinkable precision.

Expansion, he said, may have taken any number of thousands of millions of years to get under way.

Idea For New Industry

Japan Supplies Steady Demand For Discarded Silk Stockings

This is a time for economy, and we imagine that even those who wear silk stockings would not disdain a suggestion in that direction. Mr. A. Keith Doull, assistant trade commissioner at Tokio, writes in the Commercial Intelligence Journal that there is a steady demand in Japan for used pure silk stockings. Buyers will take all that they can get, provided, of course, that the prices quoted are in fair proportion to the price of raw pure silk. It is estimated that about 500 tons are imported annually, although in good years the amount might be double this figure. The principal source of supply is the United States, although small quantities have been imported from the United Kingdom and France. These discarded stockings are manufactured by the Japanese mills into silk thread which is fabricated into a silk crepe used for making ladies' cheap kimonos. We do not know how many silk stockings are worn in Canada, but judging by the display on the streets the annual discard should be large.—Toronto Mail and Empire.

The British Way

Right Of Free Speech Not Curtailed In Hyde Park

While the great American people—followed by the great Canadian people in their turn—are falling over themselves to put down the right of free speech when it is even faintly suspected that there may be a tinge of red in it, it is refreshing to read that in the land of true liberty they do things differently.

Word comes in the English-press of the Communistic celebrations in London on May Day. Hyde Park was filled with Communists, 30 speeches were made simultaneously, and great resolutions passed. Then they went home. No one was injured and the police merely looked on.—Vancouver Province.

The Retort Courteous

"Gentlemen" said a speaker at a political meeting, "most of you know the reason of my addressing you this evening." "Yes," shouted a voice from the rear, "so as you can make a fool of yourself!" "There, my friend," replied the speaker, "you have a distinct advantage over me, for Nature, in her kindness, has saved you the trouble."

Harry: "Polished woman, Mrs. Sinnick, don't you think?"

Beata: "Very. Everything she says casts reflection on someone."

God's greatest gift to woman is economic independence and the second greatest is rouge.

HISTORICAL GROUP OF OFFICERS REHEARSE FOR ALDERSHOT TATTOO

The brilliant display which will be witnessed this month, when the Aldershot Tattoo takes place in England, can be judged from the frequent photographs of the elaborate preparations which are reaching Canada. Above is an historical group of officers: Left to right: Zouave officer; Lord Nelson; Sir Francis Drake, and the Duke of Marlborough.

Canadian Radio League Officials Regret That Salaried Commission Will Conduct Broadcast System

Noise May Accompany Auroral Display

Possibility Being Studied By Royal Society Of Canada

The question of whether sounds sometimes accompany auroral displays in the sky came in for discussion before section three of the Royal Society of Canada at Ottawa.

Just because the currently held belief as to the cause and nature of aurora does not provide for any sound to be heard, Dr. J. S. Plaskett, director of the astrophysical observatory on Vancouver Island and the holder of the Flavelle medal of the Royal Society of Canada for 1932, thinks that the great body of evidence that sounds have been heard should not be discarded.

He read a paper before the section, prepared by Dr. C. S. Beals, of the observatory staff, in which it was stated that the only interpretation of the observations which seems to fit all the fact is that both the sounds and low level apparitions sometimes reported are real and that they constitute normal though perhaps unusual accompaniments of other auroral phenomena.

"If this is so," it is stated further, "there must be some definite physical process taking place close to the earth's surface which is able to produce the effects that have been observed. The aurora has long been considered to be electrical in origin and the hypothesis that the auroral sounds and low level displays are due to some sort of electrical discharge near the surface of the earth seems a very reasonable one."

Had Excellent Manners

But Chimpanzee Was Barred From Dining Room On Liner

Suze, in a brown sweater and a pair of shorts, sat on a trunk in the Cunard luggage shed at New York, oblivious to the stares and whispers of passersby as became a chimpanzee "educated," according to her owner, "to a high state of culture."

Suze was a bit piqued—but did not lose her good manners—when both the purser and the master of the "Mauretania" ruled that she could not sit at table in the first class dining room, as suggested by her owner, Mrs. Wood Kahler, wife of the novelist.

Instead, a steward served her meals in her cabin, which she shared with Mr. and Mrs. Kahler. The steward found Suze not only dexterous with knife and fork, but discriminating in her diet.

Suze, brought from Africa to Vienna two years ago, had her meals at Mrs. Kahler's table at home, went walking with her, did errands about the house, and recognized her friends, Mrs. Kahler finding her "highly intelligent and better behaved than some humans."

Assist Poultrymen

Hon. Robert Weir, Minister Of Agriculture, Promises Continuation Of Government Aid

Continuation of the assistance given by the government to poultry breeders desirous of securing registered cockerels for their flocks, was announced by Hon. Robert Weir, Minister of Agriculture. The assistance amounts to transportation charges and a sum of $1.25 per bird toward the purchase price providing the cockerels pass the inspection tests and are shipped in lots of ten or more.

The purchases must be made from bona fide breeders entered under the federal policies of registration or record of performance. There is no restriction to the sale price.

The Only True Verdict

The natural tendency of our jury system is toward compromise verdicts. In most cases, the only perfectly honest ballot ever taken by a jury is the first one. The true opinions of each juror are usually expressed in that ballot. Thereafter the process of compromise sets in. When there is a final agreement by 12 men in a doubtful case, it means that somebody has yielded his convictions.

Plenty To Learn

And while on the subject of the excessive expense accounts of our legislators and government officials, let it be observed that members of the British parliament are now allowed only third-class fares when they travel, and even at that the tickets are issued only between London and their constituencies. We've a lot to learn from the old land.—Farmers' Sun.

Wealth Hoarded In States

Money estimated to amount to $1,300,000,000 is being hoarded by Americans in the United States. President Hoover, in a recent appeal for the release of this money, stated that every dollar thus hoarded was equal to "the destruction of from five to ten dollars in credit."

The custom of naming craters and other objects on the moon after famous astronomers was begun by the seventeenth century astronomer, Riccioli.

Regret that a salaried commission was to be appointed to conduct Canada's proposed new radio broadcasting system was expressed by officials of the Canadian Radio League, which organization was largely instrumental in the presentation to the parliamentary committee of the basis for the radio policy adopted at the session just concluded. It had been felt by the league that the commission should be composed of voluntary workers, "thus ensuring greater freedom from political interference, and constituting a buffer between the government and the operating organization."

A statement was issued by Allan Plaunt, honorary secretary, following a meeting at Ottawa at which it was shown that the organization had been financed since its inception 18 months ago, at a total cost of $5,000, more than half of which, Mr. Plaunt said, was contributed by members of the executive.

The league will remain in existence as a "watchdog and friendly critic" of the proposed "Canadian Radio Broadcasting Commission," it was stated, and will branch out with a view to securing more members and a wider organization.

Satisfaction was expressed at the successful conclusion of the campaign directed by the league and at the terms of the Radio bill adopted by parliament, except that it was felt, if salaries were to be paid the commissioners, they should be larger than those provided. The legislation authorized a salary of $10,000 for the chairman and $8,000 for the two commissioners.

Graham Spry, chairman of the league, said that the salary of the chairman did not equal that paid either responsible business positions or leading university presidents. The commission would handle as much as $4,000,000 a year, he said and would be controlling programmes that would be listened to by the whole of Canada for a number of hours a day. Such responsibility should be vested only in the most intelligent and competent hands, "but the commission, as proposed, cut off the possibility of voluntary services and does not pay enough to ensure that at least the chairman will be an experienced and responsible man," he said.

Industries In India

Sugar and Cotton Trade Is Showing Big Increase

India continues to prove itself the land of strange contradictions. Despite its own condition, Sir George Schuster, its Finance Member, finds that India's budget, which is balanced over a three-year period will show a surplus. Gold sales at a high price explain the satisfactory situation only in part. The sugar industry, for instance, is expanding, 13 important factories being in construction and seven others planned. The cotton mill trade shows large increase. Postoffice savings deposits are expected to advance one-third this year. A cheerful disclosure is made as to where the ready resources lie — the masses show that they have a considerable amount of money available for investment.

To Ameliorate Conditions

World Conference To Consider Price Slump Is Considered

Ambassador Andrew W. Mellon has asked the foreign office whether Britain believes a world conference to consider the universal slump in commodity prices would ameliorate the general economic crisis.

The ambassador discussed the question with Sir John Simon, the British secretary of foreign affairs, but thus far nothing definite has developed. The ambassador's query remains under consideration by the British government.

Will Be Great Help

Another helpful little item is reported from England where a scientist has succeeded in splitting the atom. Folks who heretofore have been compelled to use a whole atom at one time and waste part of it can now use half an atom, and be mighty glad of it.

There are about 18 distinct varieties of cheese; the 400 or more names given to cheeses are of local origin.

Damascus, Syria, is said to be the oldest city in the world.

"I can't understand medicine. The doctor has ordered my wife to take a bath every day, and it is not because she is dirty."—Pages Gaies, Yverdon.

Those New Summer Suit-Frocks

Endorse the Vogue of Rough Crepes

Cool, Summery Suit Frocks of rough finished white silk crepe, with jaunty jackets in nassau blue, Hollywood green, Mascara brown—some with jackets in candy stripes. Others again in rose, pink and canary with brown jackets. Equally as smart is another grouping in pastel shades with contrasts! Their jackets are long sleeved or sleeveless. Some display scarf treatments—others are trimmed with motifs. Sizes 14 to 20.

Temptingly Priced at $15.00

Women's Martha Washington Printed Cotton Tub Frocks $1.95

Such smart, gay and colorful printed frocks as these are sure to bring many new customers to our house dress section. Some collarless, others with collars, flared and pleated skirts. Sleeveless, cap sleeves or short sleeves. Styles for miss or matron. Sizes 14 to 51. Priced $1.95.

Women's Lovely Sheer Grenadine Chiffon Stockings—Super-Silk Brand $1.00

Filmy clouds casting lovely shades complementary to the new summer frocks. Beautiful stockings of sheerest Grenadine chiffon—pure silk from top to toe. Full-fashioned and with the newer narrow square heel and picot edge top. Sizes 8½ to 10.

Wabasso Lawns, Voiles, Organdies, India Linens

All have the Wabasso guarantee of absolute purity.

Fast Color Broadcloths and Suitings

In white and pleasing shades. Wabasso Brands for purity. **25c. and 40c. yard**

Wabasso Printed Silks

Beautiful patterns in shades as pretty as the rainbow. These are guaranteed tub fast too. 36 in. wide. **45c. to 75c. yard**

Wabasso Silks in Self Colors

And in many shades and fast to washing. **35c. to 60c. per yard**

Wacosilke

Made from Wabasso Combed Yarns and Celanese Brand Yarns. Pretty as the rainbow. Will not shrink, fade, pull or sag.

GULL LAKE SPORTS COMMITTEE HOLDS SUCCESSFUL MEETING

At a well represented meeting of the Gull Lake Sports Committee, held in the town hall here, on Thursday night, plans were furthered for the Gull Lake Wrigley Swim Regatta to be held on July 20th, 1932.

Various phases of the Galla were discussed, and suggestions made that will tend to make this year's Regatta a greater success than last. One thing, and we believe it is the most important was the better arrangements must be made for the spectators. It was decided that the Pier will be kept free of all save the officials. This will enable all those on shore to see everything. Another improvement will be in the announcing end of the affair, and it is thought no complaint will be made this year by those not hearing the announcements.

A. M. Campbell, president of the committee, was chairman, and Barney Halpin, acted as secretarp.

The following officers were elected:

President: G. T. Jackson.

Vice Presidents: Chairman of all committees.

Secretary, Barney Halpin.

Committee on Finance: A. Belcher, Chairman; D. F. Chisholm, John Gilmour, Dr. Archibald, Edmonton, and Ruben Ward, Calgary.

Reception Committee: Chairman, A. M. Campbell; Judge McGillivray, Mrs. Cecil Sutherland, Edmonton; Percy Parsons and C. B. Halpin, of Lacombe.

Course Committee: D. Hay, chairman; Frank Dwyer, Bentley; Vic Horner, Edmontnon; P. C. Owen, Lacombe. C. F. Damron, Bentley.

Grounds Committee: F. E. McLeod, Chairman; Thos. Wilkes; P. W. Pratt; Joe. Taylor, all of Lacombe; J. M. Imrie, Edmonton.

General Committee, the President and Chairman of all committees.

It was decided that tags will be sold at a nominal price of 10c. This will help considerably in defraying the heavy cost of putting on an event such as contemplated.

The programme will be as follows: The Wrigley Swim for Men, one mile, Alberta Championship, (open).

The Wrigley Swim for Women, one mile, Alberta Championship, (open).

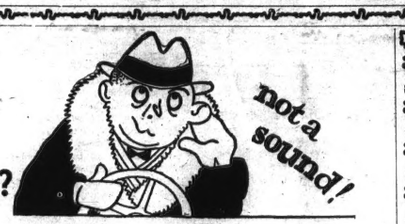

Motor Boat Race: 21 miles, three heats. Alberta Championship.

Canoe Races: Men's Singles, Doubles, Fours, Mixed Doubles. Ladies' Singles, Doubles. All Alberta Championships.

Canoe Novelty Events: Diving Exhibition and Exhibition of Life Saving by the outstanding Life Saving Crew in Alberta.

The programme will start at 2 p.m. sharp.

For further information and entries, apply to Barney Halpin.

KID DEER'S PROTEST

We notice with interest that a Red Deer Association have taken a stand against the catching of Jackfish in Gull Lake, that is, they claim that too many fish are being caught. Their protest is as amusing as it is absurd. Those people, who are in a position to know have a different story to tell. Although quite a number of fish are being caught, we are aware of no one who has caught over the limit set by the Department, and having been at the fishing grounds ourselves, know beyond a doubt that the average fisherman at Gull Lake is satisfied with three or four fish. Why should the Red Deer Association take it upon themselves to tell what should be done at Gull Lake. Possibly their intentions are of the best, but they should acquaint themselves with the facts before complaining to the Government. Those who know Gull Lake, are in a better position to judge whether too many fish are being caught or not, and we would like the Red Deer Association to take a run down some day and see the shoals of Jackfish that pass by the Government Pier. Possibly if they were shown, they would be in a better position to say something about it. It is funny that a Red Deer Association should try and discredit Gull Lake sportsmen when a Red Deer citizen boasted of a record catch he had made—he was proud of the fact that he took one hundred Jackfish from Gull Lake in one day.

J. A. HAZLEWOOD DEAD

James Albert Hazelwood died in a Calgary hospital Wednesday morning after a lengthy illness, at the age of 59 years. He was born in Kirkton, Ont., and came west to Calgary in 1912. He later moved to Hanna and then to Sylvan Lake, where he was proprietor of the Sylvan Lake hotel for eight years. For the past six years he has been operating a barber shop in Lacombe. He is survived by his wife, Mrs. Maud Hazelwood; two daughtors, Mrs. F. R. Stewart, Black Diamond, and Marguerite, at home; also four sisters and one brother in Ontario, and two brothers in Alberta. Services, conducted by William Aberhart, will be held at the Jacques funeral residence Saturday afternoon at 2.30 o'clock, interment in Burnsland cemetery.

LOOKS LIKE CASE OF FAVORITISM

Dilatoriness in taking out new automobile licenses has been rewarded by the Brownlee Government. Beginning June 15th there was a five dollar reduction in the annual fee. This generosity is not retroactive and therefore the motorists who purchased their licenses early in the year are discriminated against in a most arbitrary manner. It will be recalled that the government used the police as agents to hound the dilatory urban motorists into buying license early in the year and the provincial treasury has had the use of this money for several months. Apparently there was no such official compulsion in evidence in the rural districts, and the five dollar reduction is a bait to the automobile owners in the rural districts to pay up.

It looks like one more illustration of the pronounced occupational bias of the present provincial administration. There should be the same regulation for all classes in a matter of this kind. The action of the government is likely to produce unsatisfactory repercussions in the new year. Urban motorists may be pardoned if they then delay the purchase of a new license plate until they are thoroughly sure the government does not intend to spring any favoritism such as exemplified the present instance.

A BAD CRASH

A Nash car operated by Rod Reed and a Ford Coupe driven by Miss Atzinger, of Blackfalds, came together on the Trail near the Madden farm on Saturday. The Nash was almost demolished, and the Ford also sustained considerable damage. With the exception of minor cuts and bruises the occupants of both cars escaped serious injury.

The New Swim Suits

We have just received a new shipment of Bathing Suits for Men and Boys, and they are good to look at. We have priced them very low. They are the famous lines of Jantzen's and Woods, recommended by swimmers all over the continent.

Get Your Summer Suit Now

As usual we have the very latest patterns and colors for your new summer suit, which we will have made to your measure for the price you have been paying for a ready-made. Come in and look over our samples. We have had very wide experience in catering to men who want the best; we know how to take your measure and have your clothes made to suit your individual requirements. Your money back if you are not satisfied. But we know you will be—we have dressed thousands of satisfied customers.

Your Straw Hat Is Here

We have a nice line of Summer Straws in all the latest shapes and band colorings for young men. The prices this year are lower than you have ever seen them, and the outlook for a hot summer will give you the urge to get one now. You can get a work hat or dress hat for **20c. up to $1.50**

Now We Clean Out Oddments

Our sale has left a lot of odds and ends throughout the store; broken lines and odd sizes, which we are going to clear out regardless of cost. These odds and ends are from our regular stock, and we are only asking a fraction of their former selling price—we are going to get rid of them. We are busy unpacking new goods for Spring and Summer and having our store thoroughly remodelled. In a short time we will have for your convenience the cleanest and most up-to-date line of men's furnishings in Alberta.

DAVID HAY Men's Wear Lacombe

Cleaning, Pressing and Repairing, Promptly Done.

Tommys Cafe In New Quarters

His expanding business requiring more accommodation Tommy has moved his Cafe from the building next door to The Western Globe office, to more commodious quarters in the Fosnaugh building, just across the street from the Adelphi Hotel. He has installed a Frigidaire system of refrigeration, and his patrons are now assured of the very best service. He employs only white help, and his prices are the same as usual—25c. for a first class meal. His dining room is clean, cool and airy, and he guarantees the best service. Watch for further announcement.
